

THE SEARCH FOR VACCINE TRUTH CONTINUES

## New Zealand Covid vaccination campaign turns into drama, doctors sound alarm in open letter

### Description

NEW ZELAND: Mainly young people, even children, died suddenly and unexpectedly, often after blood clots in the brain or heart. The non-governmental organization 'New Zealand Doctors Speaking Out With Science' calls the situation a "humanitarian crisis."

The vaccination campaign in New Zealand is turning into a major drama. There is "a shockingly large burden of deaths and injuries following the Covid-19 vaccines." The situation is getting so out of control that New Zealand doctors have written [an open letter](#) calling on authorities to investigate the post-vaccination deaths. The doctors have banded together under NZDSOS, short for New Zealand Doctors Speaking Out With Science.

They write that a shocking number of deaths and injuries occurred after the Covid vaccination. In addition, the doctors say certain systems were disabled to conceal the extent of the damage.

Children and young people are dying and suffering. Many healthy elderly people have also died. We are being lied to, the group says. Health Forum New Zealand tracks all deaths and injuries after vaccinations.

The organization's database includes about 500 deaths. In their open letter, NZDSOS doctors give the (fictitious) names of about a third of all victims. The actual names are known to the police.

These are mainly young people, even children, who died suddenly and unexpectedly, often after blood clots in the brain or heart. NZDSOS calls it a "humanitarian crisis." "For God's sake, let's make sure our MPs and police put an end to this now!"

Eddie (13) from Wellington died in his sleep a few days after vaccination, Joanna (15) collapsed in her bathroom and died on the way to the hospital, Timothy (33) died of a heart attack two days after vaccination, Annabelle (38) died in September 2021 two hours after her second vaccination.

The hospital confirmed that she had died from the vaccination but forced her family to sign a vow of

silence.

Maggie (47) fell ill after receiving the booster vaccination, which the coroner said she should not have received at all because she was immunocompromised. Mark (52) died suddenly in his sleep after his second injection.

Alyss (31) was urged by her family doctor to have the injection but suffered a brain hemorrhage 10 days later and died. Bodybuilder Alex (25) died in his sleep after receiving his first vaccination.

Satya from Manurewa died in her sleep after receiving the vaccine. Ana (43), also from Manurewa, died in her sleep shortly after receiving her booster. Lefty (23) suffered a fatal stroke in his sleep after his second shot.

Timothy, a healthy 60-year-old, died of a heart attack three hours after his first shot. And there are hundreds more such cases.

The open letter can be read [here](#).
