

## Permanent “lethargy syndrome” and long-term loss of motor skills now common “side-effects” of Covid-19 vaccines

### Description

Plain and simple, lethargy is a lack of enthusiasm and energy, but what causes it? It could just be normal response to stress, overworking, lack of a good night’s rest, or even lack of nutrition. Everyone is familiar with feeling sluggish and weak, but not permanently, immediately following inoculation with the Covid-19 vaccines. This is different. After a few weeks, and several doctor visits, nobody seems to be able to figure out what’s wrong, and that’s because the “science is settled” on vaccines, though not really at all.

Just because you say a slogan over and over doesn’t make it true. The Covid vaccines are very far from “safe and effective.” They’re outright dangerous and detrimental to health, including normal daily functioning. For example, motor skills are something most of us just take for granted on a daily basis, like standing, walking, climbing stairs, balancing, coordinating, reacting and so on. This would include gross motor skills and fine motor skills, but what if you suddenly lost many of these abilities, right after getting jabbed with these so-called “safe and effective” experimental concoctions?

Now, there’s a wave of [victims of vaccine](#) coming out and explaining how they’ve lost motor skills, some while experiencing relentless, excruciating pain for weeks or months on end. Some victims are saying these crippling “side effects” come on 3 or 4 days after inoculation, and are lasting for 3 to 4 months, including constant lethargy, excruciating shooting pains going up their spine and neck, blindness, deafness and depression.

## All Covid-19 vaccines are documented as a “medical experiment” by “emergency use authorization” only, according to the CDC and FDA

We’re talking about the [most experimental inoculation](#) ever created, untested, unproven and classified by the FDA and CDC as a “medical experiment.” Oh, yes they did. *Emergency Use Authorization* was all they could get for this, and the drugged up animals are suffering from immediate and long-term

health detriment.

Eric Clapton received the [AstraZeneca Covid-19 vaccine](#) and said, “I took the first jab of AZ and straight away had severe reactions which lasted ten days.” He said he thought he “would never play again.” Six weeks later he was told to take the second AZ shot, without being informed of any dangers whatsoever. Clapton said his body’s reactions were disastrous, and froze his hands and feet, rendering them “useless for two weeks.”

He suffers peripheral neuropathy now, even though the vaccine propaganda machine can only spew out the same tired lie in response to every injury and every death, claiming every single Covid-19 vaccine is 100 percent safe and 100 percent effective, at all times, everywhere, for everyone.

## **Will Eric Clapton ever play guitar again? Some people have gone deaf and blind too after getting these toxic Covid jabs**

In the United Kingdom, [35 people have gone deaf](#) almost immediately after getting the Covid-19 vaccine, and 25 others went blind after getting stuck with the mRNA inoculations. This is tracked by their yellow card system (similar to our VAERS system) that posts injuries, side effects and “adverse events” – which already reveals over 190,000 cases/reports.

These include varying degrees of extreme injuries. AstraZeneca’s vaccine accounted for 60 percent of all of these, including responsibility for 58 percent of the people who went blind or deaf. Tack on over 400 deaths reported in just this yellow card system, with nearly half of those attributed to Pfizer’s deadly concoction.

This is news you never hear on mainstream media USA networks. This is completely banned from any postings, videos or memes on ALL social media platforms, including YouTube. As far as Americans know, there are ZERO problems with any vaccines ever made, including all of these dirty, blood-clotting jabs for Covid-19. They simply have no clue, no news and no facts.

Then, as if that wasn’t bad enough, there’s this horrifying statistic: Among younger adults and youth, Covid-19 vaccines have KILLED over 250 times the amount of people the actual virus has killed. Let that sink in for a minute. Now why should any company or organization be ALLOWED to say the words “safe and effective” in the same sentence as vaccines, if you’re going to be censoring something?

Visit [CovidVaccineReactions.com](#) if you already got a toxic Covid jab or two and you are experiencing side effects, blood clots or other adverse events. Then tune your internet frequency to [Pandemic.news](#) for updates on these [crimes against humanity](#) being delivered under the guise of inoculation.
