

POPULAR YOUTUBE PERSONALITY DESTROYED BY PFIZER VAX INDUCED CANCER (LEUKEMIA) (VIDEO 2 min)

Description

She was all excited about getting the covid vax before it was her age groups turn (South Korea). She just could not wait and made a video about it. Think about it...she was excited about cutting in front of someone else to get a jab that is going to kill her. How lucky can you get? Now she can make videos about dying a horrible death due to cancer. I wonder if she or any of her followers will figure out what is causing this cancer surge? I wonder how long before they demonetize or take down her channel? I bet if she says the wrong things about the vax, they will take down her YouTube channel. Better tow the mark.
