RIGGED: Deep State FBI held ‘weekly’ meetings with Big Tech to defeat Donald Trump in 2020

Once again, the FBI has proven it is not a ‘federal law enforcement agency’ whose primary responsibility is protecting the country and investigating federal offenses, but rather a thug political operation whose first and only job is to protect the deep state elite.

We already knew that the bureau, under then-Director James Comey and Assistant Director Andrew McCabe, was involved in attempting to sabotage Donald Trump’s 2016 presidential bid with a sham “counterintelligence investigation” into possible “collusion” with Russia. The bureau even paid a former British spy, as did the Democratic National Committee and the Hillary Clinton campaign, to create a fake “dossier” filled with insane, and provably false, allegations about Trump.

The media jerks who are part of the deep state ensured that the story wouldn’t die during the bulk of Trump’s first term, but it wasn’t enough to ensure that he wouldn’t receive a second term. In fact, as 2020 proceeded and Trump began to get a handle on the COVID-19 pandemic and his polling numbers rose along with visible support wherever he campaigned, the FBI and the rest of the deep state were working several fronts to sabotage Trump’s reelection chances.

One of those fronts was Big Tech.

According to reports this week, the FBI engaged in “weekly” meetings with big tech platforms to ensure that any information beneficial to Trump and, importantly, *harmful* to the Democrats’ brain-addled nominee, Joe Biden, and his corrupt son, Hunter Biden, was hidden from view to the maximum extent possible — couched, of course, in “fighting against misinformation.”

The revelations were announced by two Republican attorneys general, Eric Schmitt of Missouri and Jeff Landry of Louisiana, who sued the big tech platforms to find out how deep the collusion and corruption went.

“BREAKING: In our deposition of FBI agent Elvis Chan on Tuesday, we found that the FBI plays a big role in working with social media companies to censor speech – from weekly meetings with social media companies ahead of the 2020 election to asks for account takedowns,” Schmitt tweeted last week.

“Chan, the FBI’s FITF, and senior CISA officials had meetings with social media companies in the lead-up to the 2020 election, in which Chan personally told the social media companies that there could potentially be a Russian “hack and leak” operation shortly before the election,” the Show-Me State AG continued.

“Those meetings were initially quarterly, then monthly, then weekly heading into the 2020 election,” Schmitt continued.

“Chan stated that the FBI regularly sent social media companies lists of URLs and social media accounts that should be taken down because they were disinformation from ‘malign foreign influence operations.’ The FBI then inquired whether the platforms have taken down the content,” he continued (the bureau always couches these viewpoint censorship campaigns as attempts to interdict ‘malign foreign actors’ — it’s a lie).

“On many occasions, the platforms took down the accounts flagged by the FBI,” he noted further.

Blatant FBI election interference. This is why this agency needs to go away or, at a minimum, everyone at the rank of supervisor needs to be replaced. Our country is being stolen from us one election at a time.
