

RIGHT NOW would be a very good time to wake up!

## Description

The “G20 Bali Leaders’ Declaration” exposed the “secret” that I have been trying to warn the world about for months.

**THE PROBLEM IS ACTUALLY MUCH BIGGER THAN MOST PEOPLE THINK.**

The videos below are mostly true, but also partly inaccurate.

Please read this article in order to better understand the enormous dangers that we will all be facing in the very near future.

## **NOTHING was enacted into law during the G20 event in Bali.**

What did happen was the “leaders” **let the cat out of the bag** regarding their intentions to amend the International Health Regulations in an attempt to create a global “digital health certificate”.

They also **let the cat out of the bag** in stating that they want to enact these changes this upcoming May (2023), rather than in May 2024 like they have officially been saying for most of the year.

***We support the work of the Intergovernmental Negotiating Body (INB) that will draft and negotiate a legally binding instrument that should contain both legally binding and non-legally binding elements to strengthen pandemic PPR and the working group on the International Health Regulations that will consider amendments to the International Health Regulations (IHR) (2005) mindful that the decision will be made by World Health Assembly.***

***We acknowledge the importance of shared technical standards and verification methods, under the framework of the IHR (2005), to facilitate seamless international travel, interoperability, and recognizing digital solutions and non-digital solutions, including proof of vaccinations. We support continued international dialogue and collaboration on the establishment of trusted global digital health networks as part of the efforts to strengthen prevention and response to future pandemics, that should capitalize and build on the success of the existing standards and digital COVID-19 certificates.***

The G20 “leaders” know very well that the World Health Organization is secretly negotiating amendments to the International Health Regulations (IHR). They also know that the IHR don’t really have anything to do with health.

The International Health Regulations really should be renamed “The International Surveillance, Monitoring, Reporting and Compliance Regulations.”
