

Roll Up Your Sleeve For Jab #3! Fauci Says We All Need Boosters!

Description

USA: Dr. Anthony Fauci, one of the planet's head medical tyrants has said we should all be prepared to take a booster shot of the experimental gene therapy they [continue to falsely call a "vaccine."](#) People with compromised immune systems should take the third shot right away, according to Fauci.

"No vaccine, at least not within this category, is going to have an indefinite amount of protection," [Fauci told NBC News.](#) "So in answer to your question, it's right. Inevitably, there will be a time when we'll have to give boosts."

Did anyone really think they wouldn't move the goalposts again? Soon it'll be: no food without proof of your 15 booster doses.

[They Moved The Goalposts...AGAIN!: "It's Not Over When The Vaccine Arrives"](#)

This should surprise no one. They believe they have the masses convinced that there's some deadly disease out there which their own studies have shown to be a [relabeling of the common cold and the flu](#).

?

Fauci said "vaccinated" people don't need boosters just yet, but they will. He added that other members of the ruling class in the United States, called health officials, are doing daily, weekly, and monthly tracking of how vaccine antibody levels are diminishing over time and preparing to roll out booster shots when necessary, [according to a report by RT](#).

Back in July, World Health Organization Director-General Tedros Adhanom Ghebreyesus said vaccine distribution is unequal. "This inequity has created a two-track pandemic." Ghebreyesus says countries like the U.S. should refrain from giving booster shots until the poor countries have had their doses. "We continue to see a shocking disparity in the global distribution of vaccines and unequal access to life-saving tools," Ghebreyesus said.

Does anyone want to donate their now three doses to a poor country?

The rulers are faking concerns over the possible waning of vaccine protection over time has escalated amid the rampant spread of Covid-19's Delta variant. Since COVID-19 doesn't exist, neither do the variants. [A CDC study released in late July showed that three-fourths](#) of those infected during a recent Delta outbreak in Cape Cod, Massachusetts, had been fully vaccinated.

[6 Fully Vaxxed Wedding Guests Caught The "Delta Variant" OUTSIDE, And 1 Died](#)

The [Food and Drug Administration has now given emergency use authorization](#) to the booster shots as well. If you want to take a glimpse into the mental state of the fear-riddled panic-stricken sheep, be sure to check out their response to this tweet from the FDA.

Today, FDA amended the emergency use authorizations (EUAs) for both the Pfizer-BioNTech COVID-19 Vaccine and the Moderna COVID-19 Vaccine to allow for the use of an additional dose in certain immunocompromised individuals. <https://t.co/MYoTvX82IMpic.twitter.com/cqwF5j8pYp>

— U.S. FDA (@US_FDA) [August 13, 2021](#)

We knew this was coming. They've been telling us for months now. We are expected to line up like good little slaves and just obey the master's orders. Stay alert. Stay prepared. Keep honing your critical thinking skills. This will ramp up more quickly once these shots get full approval.

President Trump is Breaking Down the Neck of the Federal Reserve!

He wants zero rates and QE4!

You must prepare for the financial reset
