

## ROYAL RESET: King Charles III plans to accelerate the Great Reset and other globalist goals

### Description

**UK: King Charles III, set to be crowned as the British monarch on May 6, plans to accelerate goals he and his other globalist associates have put forward.**

It is no secret that the monarch supports agendas to mitigate “climate change,” which puts him in the same category as the globalist World Economic Forum (WEF). In fact, he outlined 10 actions the world can do to tackle this issue. These were originally delivered in the form of a speech during the WEF’s Green Horizon Summit in Switzerland in November 2020.

Among the points the then-prince brought up was the adoption of common metrics and standards to allow more informed assessments of sustainability compliance. “It is time now to move towards unified metrics and global standards, to encourage accelerated progress through uniformed benchmarking,” Charles said at the time.

The British royal figure also called on companies to “make the sustainable options the trusted and attainable options for consumers.” He continued: “With consumers controlling an estimated 60 percent of global GDP, people around the world have the power to drive the transformation to sustainable markets. We must better communicate with consumers about the sustainability of the goods, services and investments we offer.”

Investigative reporter Leo Hohmann noted that the monarch’s proposals would be “truly frightening were they ever to be fully implemented.” Under these, there is “basically no freedom in a top-down dictatorship that decides for us how all resources are to be allocated and used.”

“And what about those of us who refuse to comply with these ‘global standards?’ It will no doubt be off to the gulag, or maybe even ‘off with our heads,’” Hohmann wrote.

# Globalists are willing to do anything and tell any lie to achieve their goals

According to Hohmann, King Charles III, the globalist group WEF and the United Nations (UN) are concerned about the delay of the Great Reset and Agenda 2030 they are pushing. Thus, they have called for a summit in September to discuss getting their totalitarian plans back on schedule.

The so-called 2023 Sustainable Development Goals (SDG) Summit will be held on Sept. 18 and 19 in New York. The UN's website describes the "enormously significant" meeting as something that will "mark the beginning of a new phase of accelerated progress towards the SDG." A select group of world leaders – including the newly-crowned British monarch – are expected to be in attendance, the global body adds.

"They will carry out a comprehensive review of the state of the SDGs; respond to the impact of multiple and interlocking crises facing the world; and provide high-level political guidance on transformative and accelerated actions leading up to the target year of 2030 for achieving the SDGs."

Hohmann expressed skepticism over the meeting, however. He pointed out: "The timing of this meeting may be significant. What other manufactured crises could be upon us by mid-September? World War III? Food shortages and famine? Civil unrest?"

"It really is amusing listening to the globalists drone on about the world's problems and how their solutions will take into account everyone's best interests," he continued. Hohmann rebuked the globalists, telling them to stop talking about civic participation, sustainability, a better world and "all of the other lies."

The journalist ultimately commented that the globalists only care about domination and control, adding that they are willing to do anything and tell any lie to achieve those aims.

"And they wonder why there has been a breach of trust. People around the world have had enough of the incessant lies, manufactured crises, arrogance and intolerance of dissenting views that come down from the globalists and their elitist institutions."
