

Scaffold Tissue and Nanowires Are Most Likely the Cause of Sudden Adult Death Syndrome, says Dr. Ariyana Love

Description

 Print  PDF  Email

As evidence of rubbery “blood clot” samples pulled out of veins and arteries of “vaccinated” deceased by embalmers continues to be revealed and analysed, a little over a week ago Dr. Ariyana Love gathered her research relating to tissue scaffolding and nanowires which led to some conclusions.

“The samples pulled out of the veins and arteries of Covid vaccinated corpses shocked the world and exposed that something more than just “vaccination” is happening with the Covid vaxx,” Dr. Love wrote.

Reviewing images shown by Mike Adams of synthetic tissue growing inside people after being injected with Covid “vaccines,” she said, “this is most likely the cause of ‘Sudden Adult Death Syndrome’.”

by Dr. Ariyana Love

The **samples pulled out of the veins and arteries** of Covid vaxxed corpses shocked the world and exposed that something more than just “vaccination” is taking place.

In my latest interview with Stew Peters entitled, **Human Umbilical Cord Being Injected In Kids: Tissue Scaffolding Technology In Covid Jab**, I revealed in detail what the strange “blood clot” samples found by embalmer Richard Hirschman, actually are. The story was first aired by Dr. Jane Ruby on **Stew Peters Show** in January and was recently examined LIVE on air by scientist Mike Adams in the InfoWars studio, in a **worldwide medical bombshell**.

The [samples pulled out of the veins and arteries](#) of Covid vaccinated corpses shocked the world and exposed that something more than just “vaccination” is happening with the Covid vaxx. The fact that mainstream media did not pick up on this story is more proof we’re in dystopian times.

Embalmer Richard Hirschman's samples published by Dr. Jane Ruby

Embalmer Richard Hirschman's sample published by Mike Adams of Natural News

These images show synthetic tissue is being grown inside humans from the Covid vaxx. This is most likely the cause of "Sudden Adult Death Syndrome."

Below are images of artificially grown blood vessels by lab scientists.

Artificial blood vessels

Artificial blood vessels

There are synthetic and **natural polymers**. They are elastic and made from these five different materials:

1. **Polyester polymers PLLA and PGA** are among the most commonly used biodegradable **synthetic polymers**.
2. **Silk fibroin** protein is extruded from insects and worms. It has biocompatible properties with the human body and possesses relatively high tensile strength.
3. **Collagen** is used for bone construction.
4. **Hyaluronic acid (HA)** is a form of hydrogel material for both hard and soft tissue construction.
5. **Chitosan** is a biodegradable **polysaccharide** that comes from **chitin** via chemical hydrolysis. It's used in a gel, sponge, or fibre form.

I believe the below image from the embalmer and published by InfoWars, is a Silk fibroin tissue construct.

Certified embalmer Richard Hirschman's sample – InfoWars

Nanowires

Nanowires are being used for the hybridization of humans. Pharmaceutical companies and world governments are attempting to grow artificial tissue inside humans, using organic matter from cross-species genomics. They appear to be trying to merge humans with electronic devices for internal tracking and remote control.

Nanowires are superconductor batteries used for tissue scaffolding inside the human body. I wrote about tissue scaffolding technology in December of 2021, in my article entitled, **Quantum Dots, DNA Barcoding, Nano-Razors & The Israeli State**.

See studies and patent examples:

- [Nanowires](#)
- [Nanowire arrays for neurotechnology and other applications](#)
- [Internalization of ferromagnetic nanowires by different living cells\(2010\)](#)
- [Hydrophobic copper nanowires for enhancing condensation heat transfer](#)
- [Rotational Manoeuvre of Ferromagnetic Nanowires for Cell Manipulation](#)
- [Internalization of ferromagnetic nanowires by different living cells](#)
- [Ultrathin gold nanowires to enhance radiation therapy](#)

The presence of **gold nanowires** causes elevated lipid peroxidation and intracellular oxidative stress

under radiation. This can literally fry people from the inside using microwave frequency. This could explain why vaxxed persons are reporting torture by electrical activity in their heads and their bodies.

I believe the image below that was shared by Mike Adams on InfoWars, shows a gold nanowire.

Gold Nanowire – InfoWars

This study entitled, [Macroporous nanowire nanoelectronic scaffolds for synthetic tissues](#), reveals electrical sensors made from silicon which are lab-on-a-chip pharmacological platforms and hybrid 3D electronics-tissue materials for synthetic biology and tissue construction for inside the human body. These are planar devices used to probe electrical activity near the surface of the heart, brain and skin, acting as transmitters, transistors and receivers.

“

“This is nanoelectronics throughout biomaterials and synthetic tissues in 3D using macroporous nanoelectronic scaffolds. They are using silicon nanowire field effect transistor (FET)-based nanoelectronic biomaterials, given their capability for recording both extracellular and intracellular signals with subcellular resolution.”

Nanowires are also called detectors, metal electrodes or carbon nanotube/nanofiber or NanoES. They are implantable microelectrodes, nanoscale semiconductors and flexible/stretchable electrodes. The sensor network is flexible, macroporous and 3D. They are used to construct artificial tissue with embedded nanoelectric sensory capabilities.

Below is an image of Nanowires.

Nanowires

Organoids

Organoids are used to construct a new brain inside humans, for mind control. Organoids and transgenic hydras are being used to build a new neural network inside the body. The studies showing this can be found in my article entitled, **Pharma Exposed! Autism Spectrum Disorder (ASD) Is Targeted Gene Deletion!**

Microspheres

I wrote about Microspheres, Microbubbles and Microbeads delayed release technology in my article entitled, **Quantum Dots, DNA Barcoding, Nano-Razors & The Israeli State**.

Microspheres are in the Covid shots. They are also used for tissue engineering and scaffolding, simultaneous drug delivery and for growing cells inside the human body. The technology is externally controlled by EMF transmission. Microspheres can release their payload, for weeks, months and even years later.

This tech was developed with the purpose of destroying cancerous tumour cells and now it's being misused for the democide of humanity.

The study entitled, [Nanostructured injectable cell microcarriers for tissue regeneration](#), demonstrates that nanostructured microspheres include nanocomposite and nanofibrous microspheres which have been employed as cell carriers for tissue construction. They produce cell attachment and growth, promote cell-carrier interactions and facilitate stem cell differentiation for target tissue construction inside the human body.

A study entitled, [PHBV Microspheres as Tissue Engineering Scaffold for Neurons](#), demonstrates that Polymeric microspheres are being used to grow artificial neurons inside humans.

A study entitled, **Breathing life into engineered tissues using oxygen-releasing biomaterials** reveals that the artificial cells *feed on your blood* to grow and survive! This may explain the strange blood clots we're seeing in vaxxed injured persons. Human umbilical vein endothelial cells are used to grow the artificial cells.

This study entitled, **Generation and differentiation of microtissues from multipotent pre-cursor cells for use in tissue engineering**, reveals that Microspheres use unrestricted somatic stem cells from human umbilical cord blood.

This technology is truly vampiric and relies on human baby tissue in order to be grown inside humans. This should not be injected into anyone, especially not children!
