

Scott Ritter says 'Finland look at your history. Joining NATO is a suicide pill.'

Description

After 10 minutes, he is brilliant on NATO.

Germany after the war was never de-nazified, yet was militarised.

The US was the muscle that held off the Soviet threat during The Cold War. Berlin Wall fell. Germany allowed to re-amalgamate.

NATO became not a defensive alliance, but after Yugoslavia, it became an offensive/security organisation.

Putin in 2007 stated at Munich that NATO expansion was unacceptable. Putin said in 2009 that if the US started to take over Ukraine, Russia would have no choice but to go to war.

In 2014, the US threw out Yanakovich, the elected Prime Minister of Ukraine, and replaced him with US sympathetic regime targeting Russia.

The Nazis took over Ukraine after 2014.

250,000 Ukrainians fought for Nazi Germany in World War Two.

The CIA took over the Gehlen organisation (the Nazi intelligence organisation) and incorporated it into the CIA.

The Ukrainian nationalists regard Russians as inferior beings.

There are very strong Bandera organisations (nationalists) in US and Canada.

Ukrainian nationalism raised its head in 2014, took over the Ukraine through the threat of force, killing Russian nationalists in Odesa and Mariupol, establishing their headquarters there.

Then they set their sights on Donetsk and Lugansk.

The Ukrainian military incorporated the Nazi battalions and became Nazi itself. Now they control

everything.

Now the Ukrainian Army is being destroyed, as promised by Putin since 2009, saying Russia would go to war over Ukraine if it were to become part of NATO.

The Russo-Finnish War was not won by Finland. That is all lies. Finland surrendered. They lost that war.

Finland allied with Nazi Germany and allowed Germany to attack St Petersburg (Leningrad), and attempt to seize the northern ports.

Finland sued for peace after losing the war, and killing one million Russians, and was allowed to exist as an independent country, as long as it stays *neutral forever*.

If Finland allows foreign alliances, it has no right to exist as an independent country.

Russia is not going to allow Finland to become part of NATO.

Russia is on the verge of declaring war on Ukraine, which would allow millions of Russians to join the military.

Finland is soft. Russians will bring some bad boys out of Siberia and wipe you out.

Sweden is similar. These countries are paradises because they don't have to spend money on military.

Neutrality means neutral. Once they abandon neutrality they could be wiped out.

Let's hope the Finns are smarter than it appears.

If you join NATO you give up on your sovereignty.

The F-35A is pretty useless as a fighter but it is nuclear capable.

Poland is being given nuclear capability in this manner.

Russia will deploy tactical nuclear weapons near the border with Finland.

NATO might get involved in war over Transnistria. It could turn nuclear. Finland could be nuked along with all other NATO countries.

Every Finn will die.

Stay neutral. Survive. Enjoy the luxury of life.
