

Situation Update – EU declares fossil gas to be “green” energy as climate change narrative face plants (VIDEO 58 min)

## Description

**EU:** The EU parliament just announced a decision that’s causing the fraudulent climate change narrative to self-destruct. “EU parliament backs labeling gas and nuclear investments as green,” reads a Reuters headline from yesterday. “The European Parliament on Wednesday backed EU rules labeling investments in gas and nuclear power plants as climate-friendly,” Reuters continues, explaining that the EU has been plunged into an energy crisis that’s dividing EU nations and forcing a reevaluation on which energy sources are deemed “renewable.”
