

Situation Update, May 6, 2022 – Biden using Ukraine theater of war to DISPOSE of America's munitions arsenal (VIDEO 80 min)

Description

During the recent military withdrawal from Afghanistan, the Biden regime left behind \$10+ billion in US military hardware, including aircraft, helicopters, armored vehicles, missiles, munitions, firearms and more. This was, of course, a deliberate effort to arm America's enemies while depleting America's own military hardware stockpiles.
