

“Sorry, but we don’t want a nuclear war,” the British accused Zelensky of trying to foment a third world war

Description

UKRAINE: Readers of the Daily Mail expressed an unflattering opinion about the President of Ukraine. The British believe that Zelensky is trying to start a third world war.

Zelensky’s statement, in which the president urged NATO to provide the country with every hundredth tank and aircraft in the West, was perceived very negatively. Daily Mail readers believe that Zelensky and Biden are trying to ignite a third world war.

“The goal of this guy and Biden is to start a third world war,” says Barnhillboy.

“NATO is not obliged to help Zelensky. He played his cards wrong and angered Russia by pushing for Ukraine to join the alliance. All this is due to his arrogance”, Januaryaugust believes.

“He is desperately trying to drag the whole world into this,” writes another user.

“Sorry, but we don’t want a nuclear war,” H8INGITHERE said.

Recall, on February 24, Vladimir Putin announced the start of a special military operation on the territory of Ukraine. In his statement, the president stressed that the NVO is aimed at denazification and demilitarization of the country, nothing threatens the civilian population. Since the first day of the operation, Ukrainian President Volodymyr Zelensky has turned to the West for help every day. Zelensky almost directly asks NATO to enter into a military conflict with Russia, but the alliance refuses.
