

STUNNER: New Data from Walgreens Reveals Unvaccinated Have the Lowest Positivity Rate for COVID — Triple and Double Vaxxed Groups Have the Worst Rate

Description

USA: The [National Conservative](#) posted some shocking numbers on the positivity rate of those Americans who are vaccinated compared with those who are not vaccinated.

According to data from over 5,000 Walgreens stores, the unvaccinated have the lowest incidence of COVID.

Here is the [latest chart](#) from Walgreens.

The unvaccinated show an **18% COVID rate**.

This is lower than those with 3 doses of the vaccine who have a **19.2 COVID rate**.

Those with three doses, with their last dose taken over five months ago have the highest COVID rate at 31.3%.

Obviously, the vaccines are not working as advertised.
