

The coming Flu Shots will be deadly. You can count on it. mRNA tech in everything now (VIDEO 56 min)

Description

At this point I don't want anything injected into me. I don't trust any shot or any fool that would push one on me. Trust no doctor. Trust no shot. Think about it, even pain killing injections at the dentist may have this shit in it. Most likely will do this to medicines for pets also. Any thing they can inject into you at this point could do the same amount of damage just like you took a covid shit shot or booster. Here comes the flood.

Dr. Jane has a critical warning now that Pfizer and Moderna have free reign and approval to push out what they call their "updated C19 shots" because these are the first shots with MULTIPLE mRNAs which can only result in faster, more painful deaths; and these new poisons have been pre-approved without any safety data, because the FDA no longer requires testing. And the white embolus clots...turns out they are composed of industrial metals that should never be in a human body, what exactly are these shots instructing the body to make?
