

The controlled demolition of FOOD and ENERGY infrastructure is now under way... prepare or get crushed

## Description

The global destruction of food and energy infrastructure is accelerating by the day. The goal is rather obvious at this point: To destroy human civilization and starve as many people to death as possible by any means necessary.

Those who don't yet realize this is happening will be destroyed by it.

Some of the astonishing highlights of this deliberate depopulation scheme are covered in today's podcast:

- Western Europe's largest fertilizer manufacturer, CF Industries, has announced it is closing down its UK manufacturing plant (in Chester) and moving administrative operations to the USA, following Western Europe's "green" war against natural gas (which is necessary to manufacture nitrogen-based fertilizers). ([CFindustries.com](https://www.cfindustries.com))
- After ordering airlines to mass murder their own pilots through forced mRNA vaccines, the federal government is now threatening to "take action" against airlines for not having enough pilots. ([The Epoch Times](https://www.thepochtimes.com))
- In a similar way, the Biden regime tells oil and gas producers they will all be shut down in 5 to 10 years, but that they should hurry up and produce more fuel *right now* — and shouldn't be making any profits from it — because the Democrats don't want to lose the mid-term elections due to people being unhappy about rising gas prices. ([CNBC.com](https://www.cnbc.com))
- An over-pressurized pipe caused a massive explosion at one of the largest Liquefied Natural Gas (LNG) hubs in America, which sends 70% of its exports to Europe. ([EEnews.net](https://www.eenews.net)) This explosion is eerily similar to what caused a massive explosion at the Philadelphia Energy Solutions refinery in 2019, which permanently shuttered that fuel refining operation. ([CNBC.com](https://www.cnbc.com))
- Now, the Freeport LNG facility is going to be shut down for the entire rest of the year, taking about 20% of the LNG supply in North America offline. ([EnergyNow.com](https://www.energynow.com))
- Oil-hating, anti-civilization environmental groups are suing the Biden administration to try to shut down 3,500 oil and gas drilling permits in order to completely collapse all industry and infrastructure, leading to mass starvation and total collapse of society as we know it. ([CNBC.com](https://www.cnbc.com))
- In the state of Washington, pro-vax, pro-mask, pro-abortion Gov. Jay Inslee is now openly

warning his citizens to prepare for a summer of “blackouts, destruction and death” while moving forward to shut down four hydroelectric dams, depriving the state of 8% of its current electricity supply. ([ThePostMillennial.com](#))

- Just when you thought you could “go green” and transition away from oil, the EU is about to declare lithium to be a “toxic substance,” which would devastate lithium mining, transportation and manufacturing to create lithium batteries that power much of the green economy. Without lithium, there is no “green” infrastructure. ([OilPrice.com](#))
- Meanwhile, Union Pacific railroad has ordered a halt to carrying diesel fuel and DEF that’s necessary for modern diesel engines, causing fuel outages at Flying J truck stops across the East Coast, including Florida. ([NeedToKnow.news](#))

In addition to all this, we have widespread sabotage (arson) of food facilities taking place across the USA, combined with the illegitimate Biden regime continuing every effort to shutter pipelines, refineries and oil exploration, leading to a collapse in domestic oil availability.

This is why gas prices are skyrocketing, of course, causing higher prices in food, transportation and consumer goods.

It all adds up to the *controlled demolition* of food and fuel infrastructure for the deliberate purpose of causing global famine, poverty, chaos and death. (And don’t forget that those who were gullible enough to take the mRNA experimental “vaccine” shots are now dying at record numbers from clots, heart attacks and Sudden Adult Death Syndrome).

You are watching a global war being waged against humanity in real time, and only those who prepare will survive. **Perhaps 95% of the general population remains completely oblivious to all this**, which is why I posted a short podcast reminding us that it’s too late to “red-pill” the oblivious masses:

We anticipate **global losses will be in the billions of human beings** before 2030, just as the globalists have openly bragged about achieving.
