

## The First Casualty of War Is the Truth – The Current Western Propaganda for Ukraine Is Epic in Scale

### Description

UKRAINE: When we [shared yesterday](#) that all interested observers should be very wary of the information from media sources around Ukraine, there was a reason for that. Question everything. Take nothing at face value.

If you have never experienced the propaganda push surrounding war, the totality of the inbound *bullsh\*t* can be destabilizing, overwhelming and unnerving. It's one of the reasons why CTH doesn't share immediate information. Everyone has an agenda.

# "Ukraine President fighting on the front line

Unlike the coward who poses shirtless with bears to make up for his fragile masculinity, [#Ukraine](#)'s (Jewish!) president is on the front lines fighting for his people. This is a leader! גיבור!

We stand with you Zelensky!

*Everything we are seeing in U.S. media surrounding U.S. interests in Ukraine is a massive propaganda operation with the headquarters in the U.S. State Department and U.S. intelligence community. The sense of sympathy you are feeling is part of an intentionally manipulative operation from within this DC matrix.*

*The images, pictures, videos, speeches, soundbites and the cinematography broadcast by U.S. corporate media are all purposefully intended to create a very specific outlook within the American people toward the issues in Ukraine. The leftist United Nations, and the leftist U.S State Dept, will work together on this just like they have done in the prior examples (Ukraine 1.0, Libya, Egypt, etc.).*

It is very easy to become a victim of psychological warfare intended to manipulate our opinions.

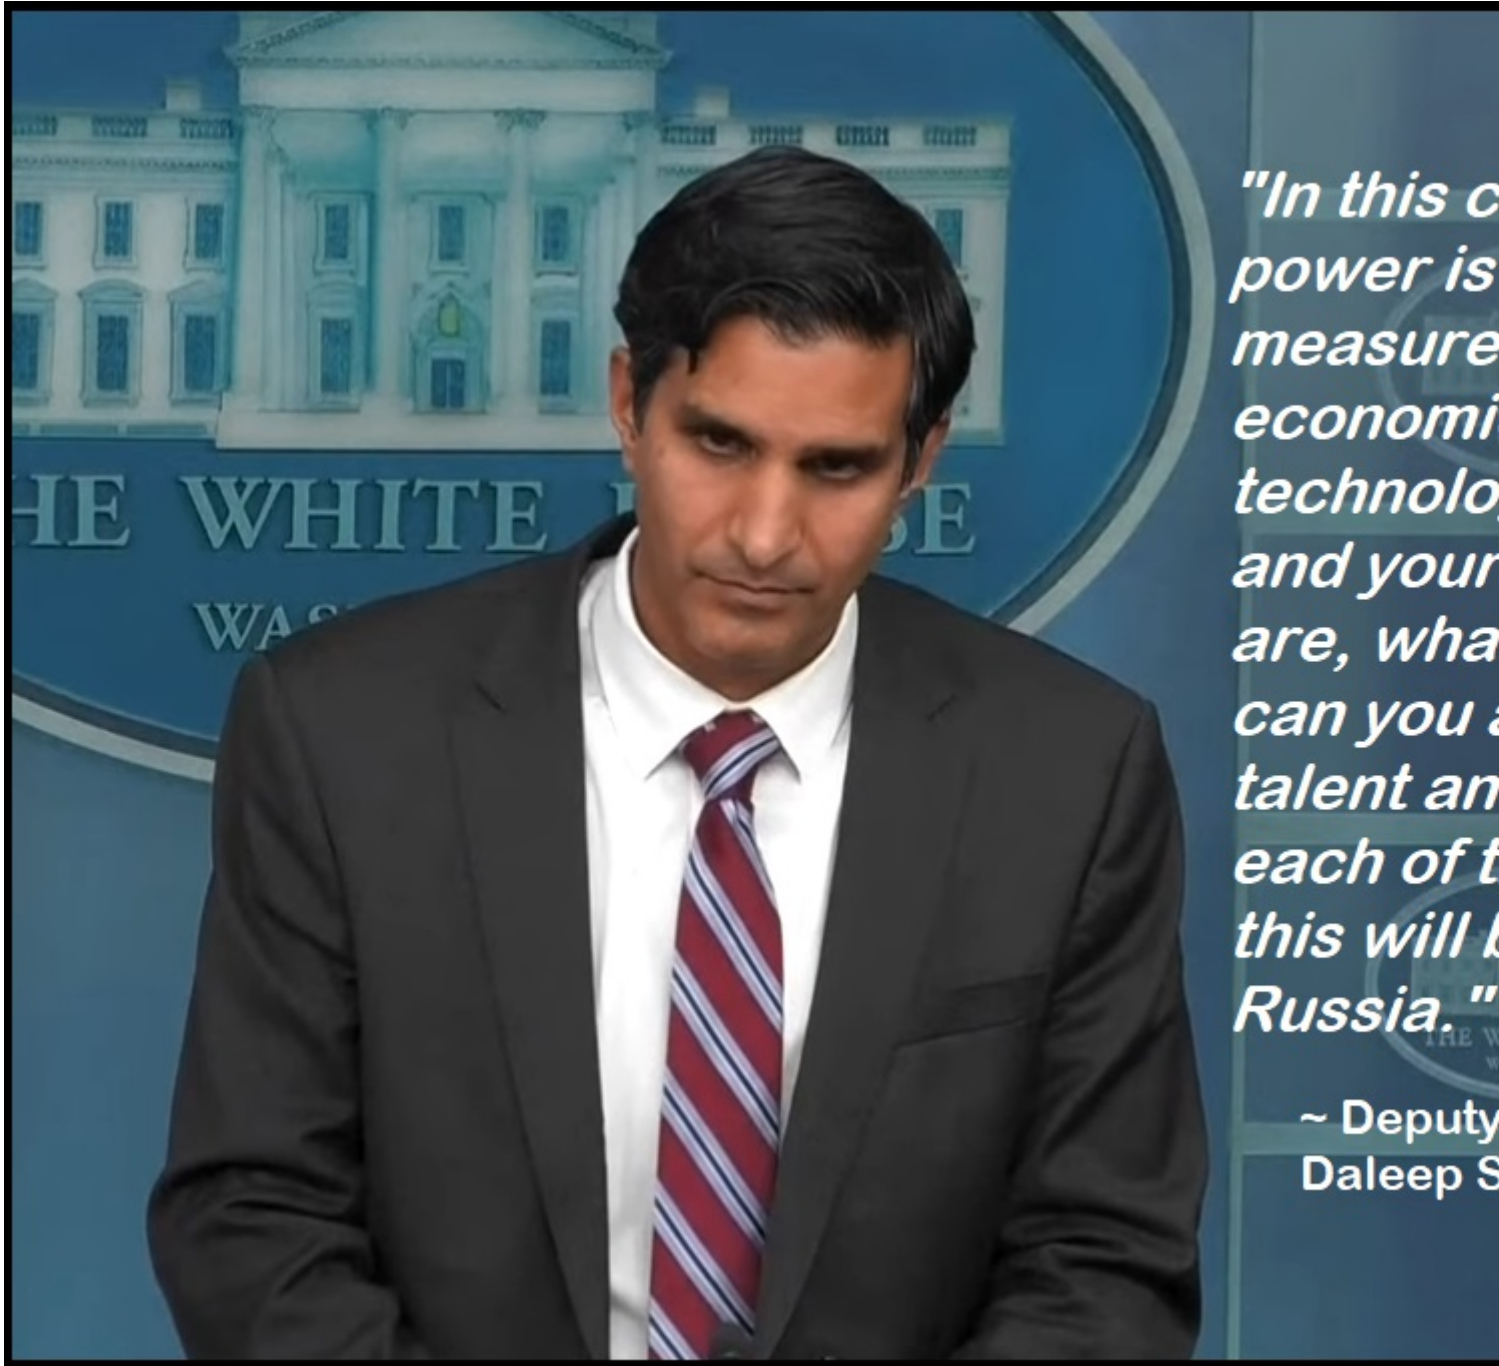

The neocons, war promoting agents working on behalf of the UniParty and the collective globalist interests, are all united in their effort.

Unfortunately, almost everything being transmitted from corporate news into our psyche is part of a battle for your mind. The goal is to create a self-fulfilling prophecy.

This is why people who are familiar with these types of tactics often tap-out when the drumbeats get loudest.

The White House, which means the total globalist effort, [tipped their hand earlier last week](#) when they defined “strategic power” and their outlook toward winning the battle for the mind. Everything is about writing a script, creating a narrative, building a “better story,” where the globalists are the heroes. In essence, the “*strategic power*” battle is for **your** mind...

..."Ultimately, the goal of our sanctions is to make this a strategic failure for Russia; and let's define a little bit of what that means. Strategic success in the 21st century is not about a physical land grab of territory; that's what Putin has done.

In this century, **strategic power** is increasingly measured and exercised by economic strength, by technological sophistication and **your story** – who you are, what your values are; can you attract ideas and talent and goodwill? And on each of those measures, this will be a failure for Russia

.”

Everything in modern warfare is *storytelling*.

Question all of it.

The stories of the 13 guards on an island telling the Russian naval ship to fuck off... yeah, it was a lie (turns out they surrendered). The “Ghost of Kyiv” pilot, the lady with the sunflower seeds etc., now all recognized as lies and propaganda. And do not expect it to stop, because it won’t. Thus, the nature of warfare for your mind.
