

The FOOD RIOTS of 2022 have already begun... they will spread globally... new intel on scarcity of food, minerals, telecom equipment and more

Description

Food riots have already begun in Iraq ([Al Jazeera](#)). Lebanon has announced rationing of wheat ([Irish Times](#)). Ukraine has [halted all exports of most grains](#), while Russia has halted exports of fertilizer and many sources of natural gas.

The world is being plunged into an engineered [global starvation scenario](#), and in North America, we only have a few months of abundant food still in the supply line.

Agricultural experts have told me the May and June crop yield reports for 2022 will be “catastrophic.” By July, it will become obvious to even the deniers that food availability — even in America — is severely hampered. **Empty shelves will plague US grocery retailers throughout the second half of this year.**

Yesterday on the Alex Jones Show, I predicted that **1-2 billion people on planet Earth will face risk of starvation by the end of this year.** Without fossil fuel-based fertilizers, 4 billion people would die (about half the current population).

Get ready for food rationing passports and armed guards at grocery stores

As I explain in my HRR podcast below, this crisis will lead to:

- Robberies and flash mob looting of grocery stores.
- Grocery stores responding by beefing up security with armed guard and security checkpoints.
- Government initiating **food rationing passports** that will eventually be tied to central bank digital currencies (CBDCs).

In other words, tyrannical governments are going to use this engineered crisis to force people into CBDCs and food rationing control systems. If you want to eat, you will be forced to use their digital

wallet system, where they have total surveillance and control over your spending behavior.

Oh, and by the way, they will collapse the dollar during all this in order to exacerbate the panic and destroy whatever assets people are foolishly keeping in dollars.

This is all covered in the 56-minute Situation Update at the bottom of this article.

Intel on scarcity of ammo, satellite phones, bulk food supplies and more

I've also posted a 20-minute intel update based on information received from an ammunition retailer, a satellite phone retailer and our own direct experience attempting to purchase bulk food resources by the pallet (many thousands of pounds at a time):

- All satellite phones are blown out of inventory, across the world, and now sat phones that once cost just \$900 are fetching \$3500 on the open market.
- Ammunition sales have spiked 166% according to one prominent retailer, following the Feb 24th Russian action on Ukraine.
- The future supply of sat phones will see at least a 40% increase in price due to [supply chain demand and disruptions](#). There are currently **waiting lists** to receive sat phones toward the end of April.
- Food commodities used in the preparedness food industry are skyrocketing in price while supply is heavily strained. The supply hasn't yet collapsed, as we still have a few months' buffer of raw materials in the pipeline, but we expect catastrophic shortages to begin this summer.

Tomorrow (Saturday) a Food Grow Network webinar is being offered by Marjorie Wildcraft, who I just interviewed yesterday. The webinar teaches "emergency gardening" skills, meaning you'll learn **how to grow food when your life depends on it**. It's a free webinar, with registration required, which will add you to her email list. Register and watch at [ICanGrowFood.com](https://www.ICanGrowFood.com) (our affiliate link). My full interview with Marjorie will be posted later today on [my Brighteon.com video channel](#).

Here's the full Situation Update podcast covering all this and more. (I will have weekend podcast updates this weekend for certain, so check the Brighteon channel Saturday and Sunday for most updates.)

About the author: Mike Adams (aka the “[Health Ranger](#)”) is a best selling author (#1 best selling science book on Amazon.com called “[Food Forensics](#)”), an environmental scientist, a patent holder for a cesium radioactive isotope elimination invention, a multiple award winner for outstanding journalism, a science news publisher and influential commentator on topics ranging from science and medicine to culture and politics. Follow his videos, podcasts, websites and science projects at the links below.

Mike Adams serves as the founding editor of NaturalNews.com and the lab science director of an internationally accredited (ISO 17025) analytical laboratory known as [CWC Labs](#). There, he was awarded a [Certificate of Excellence](#) for achieving extremely high accuracy in the analysis of toxic elements in unknown water samples using ICP-MS instrumentation. Adams is also highly proficient in running liquid chromatography, ion chromatography and mass spectrometry time-of-flight analytical instrumentation. He has also achieved numerous laboratory breakthroughs in the programming of automated liquid handling robots for sample preparation and external standards prep.

The U.S. patent office has [awarded Mike Adams patent NO. US 9526751 B2](#) for the invention of “[Cesium Eliminator](#),” a lifesaving invention that removes up to 95% of radioactive cesium from the human digestive tract. Adams has pledged to donate full patent licensing rights to any state or national government that needs to manufacture the product to save human lives in the aftermath of a nuclear accident, disaster, act of war or act of terrorism. He has also stockpiled 10,000 kg of raw material to manufacture Cesium Eliminator in a Texas warehouse, and plans to donate the finished product to help save lives in Texas when the next nuclear event occurs. No independent scientist in the world has done more research on the removal of radioactive elements from the human digestive tract.

Adams is a *person of color* whose ancestors include Africans and American Indians. He is of [Native American heritage](#), which he credits as inspiring his “Health Ranger” passion for protecting life and nature against the destruction caused by chemicals, heavy metals and other forms of pollution.

Adams is the author of the world’s first book that published ICP-MS heavy metals analysis results for foods, dietary supplements, pet food, spices and fast food. The book is entitled [Food Forensics](#) and is published by BenBella Books.

In his laboratory research, Adams has made numerous food safety breakthroughs such as revealing rice protein products imported from Asia to be [contaminated with toxic heavy metals like lead, cadmium and tungsten](#). Adams was the first food science researcher to document [high levels of tungsten in superfoods](#). He also discovered [over 11 ppm lead in imported mangosteen powder](#), and led an [industry-wide voluntary agreement](#) to limit heavy metals in rice protein products.

In addition to his lab work, Adams is also the (non-paid) executive director of the non-profit [Consumer Wellness Center](#) (CWC), an organization that redirects 100% of its donations receipts to grant programs that teach children and women how to grow their own food or vastly improve their nutrition. Through the non-profit CWC, Adams also launched [Nutrition Rescue](#), a program that donates essential vitamins to people in need. [Click here](#) to see some of the CWC success stories.
