Harari states: “And then the big political and economic question of the 21st century will be what do we need humans for, or at least what do we need so many humans for?”

Yuval Noah Harari is a 46-year-old gay vegan historian from Israel. Those personal characteristics say enough about him already. But he has been promoted endlessly by the mainstream media, especially his mentor Klaus Schwab, but also by his fellow Jewish Satanists Mark Zuckerberg, Bill Gates, and Barack Obama.

He is the shining light for NATO and the Western leadership (Macron, BoJo, Fidelito, Biden.)

When such heavy promotion is done, we know to run.

Here are some of his beliefs and statements that can be gathered from his interviews and writings.

From his 2014 book, *Sapiens*, he says “In truth, there is no God in the universe, no nations, no corporations, no money, and no human rights, and no justice outside the common imagination of us human beings.”

Well, he's right about money. It's a confidence trick run by his fellow Jews. But how dare this bastard dismiss everything else that makes us human?

From an interview clip from the link below, Harari states: "And then the big political and economic question of the 21st century will be what do we need humans for, or at least what do we need so many humans for?"

The interviewer responds, 'Do you have an answer, Yuval?', at which point Harari says: "At present the best guess we have is keep them happy with drugs and computer games."

"WEF" Harari – There is no God, Humans are Useless & Transhumans are the only Future

If you've read any of Harari's three promoted books, *Sapiens*, *Homo Deus* (2016), or *21 Lessons for the 21st Century* (2018), the common thread is a hatred for God. Harari does not believe in God, and actually goes against all His tenets by espousing evolution, transhumanism, depopulation, homosexuality, and so much more.

Which side do you think he falls on regarding the current Russia-Ukraine conflict? Let's just say Harari loves his fellow Satanic Jewish actor Zelensky.

Do you think he would bother fighting for his beliefs? As his wikipedia profile states: “He deferred mandatory military service in the Israel Defense Forces to pursue university studies as part of the Atuda program but was later exempted from completing his military service following his studies due to health issues.” Why am I not surprised?

I can't think of a single redeeming quality of this guy, except perhaps wikipedia's claim that: “As of May 2021, Harari does not have a smartphone.”

His main claims to fame are that he is Klaus Schwab's stooge, promoted out of obscurity by the likes of Gates, Zuckerberg, and Obama, and telling us all: “What do we need humans for?”.

Speak for yourself, Yuval. Anyone who hates Satan should oppose anything that comes from this guy's pen or mouth.
