

## “The Proposal is a Dystopian Nightmare” – Australian Senator Drops Truth Bomb on WHO’s “Dictator-Style Power Grab” Pandemic Treaty (VIDEO)

### Description

Australian Senator Malcolm Roberts released a video dropping a truth bomb regarding the World Health Organization’s (WHO) “dictator-style power grab” pandemic treaty.

According to the [WHO's website](#), on March 30, 2021, it announced an “urgent call for an International Pandemic Treaty,” stating that such a treaty is needed to orchestrate a single globalized response to pandemics. And, “25 heads of government and international leaders” have come together in a joint call to form the treaty.

“The World Health Organisation’s pandemic treaty and International Health Regulation amendments are a threat to Australia’s sovereignty. Similar amendments were defeated before but we must defeat them again,” said Roberts in a statement.

“Reject the World Health Organisation’s grab for dictator powers. And while we’re at it withdraw from the WHO and the UN entirely. Aus EXIT,” he added.

Below is the transcript:

There’s plenty of discussion about the World Health Organisation’s proposed Pandemic Treaty and changes to International Health Regulations.

In short, the proposal is a dystopian nightmare.

The World Health Organisation, the W-H-O, is demanding the power to dictate Australian State and Federal health policy, including ordering compulsory vaccination, lockdowns, closures of borders and businesses and, worst of all, detention of anyone not complying with the latest vaccine mandates and forced medical procedures.

Under its arbitrary rules, W-H-O can order a company to stop making drugs – the

catastrophic and murderous Ivermectin ban is one example of how this will be used.

Under these changes Australian Health Authorities would report to the W-H-O, not the Australian Parliament, ceding our national sovereignty to the W-H-O.

Killing accountability.

Australia will have to comply with every W-H-O dictate or face crippling export and money market sanctions.

The amendments even remove W-H-O's overarching principle of "protecting the dignity, human rights and fundamental freedoms of persons" and replace it with a meaningless equity statement. This reflects the intended use of these amendments to act contrary to human dignity, human rights and fundamental freedoms.

This power grab is being fine-tuned now in meetings behind closed doors and will be voted on at the World Health Assembly in May 2024.

### **Watch the video below:**

The World Health Organization is attempting a power grab' — quietly setting up a single globalized response to all future pandemics.

As previously reported at LeoHohmann.com, the deep state predators in the U.S. and Western governments have decided the world needs a centralized pandemic response controlled and run by the United Nations World Health Organization via an international treaty.

According to Europa Council, "the intergovernmental negotiating body, tasked with drafting and negotiating this international instrument will deliver a progress report to the 76th World Health Assembly in 2023, with the aim **to adopt the instrument** by 2024."

The World Health Organization "global pandemic treaty" includes a plan for a mandatory, universal digital passport and ID system.

Article 4 of the draft outlines the treaty's overarching "principles," including "universal health coverage," "equity," "transparency," "inclusiveness," "gender equality" and "diversity. "

Also, the treaty targets "misinformation" and "disinformation."

The Gateway Pundit reported that six bills are currently being introduced in the Brazilian senate that would criminalize those who refuse the mandated dose of COVID shots or who comment negatively about the vaccine's efficacy and safety, the Rio Times reported.

Senator Angelo Coronel of the Social Democratic Party of Brazil authored a bill ([PL 5555/2020](#)), which proposes adding a one- to three-year prison sentence to the Criminal Code for those "who omit or oppose the mandatory vaccination of children or adolescents" during a declared "public health emergency."

Those who choose not to comply with the country's forced vaccination schedule will face a prison

sentence of two to eight years.

Anyone spreading “fake news” regarding the safety and efficacy of the COVID vaccines will face the same prison time.

If the person works for the government, the penalty will be doubled.
