

The Ruling Class Deploys “Response Teams” To “Help” With The “Delta Variant”

Description

USA: The fear-mongering is never-ending at this point. The propaganda is only ramping up each day. Now, the rulers are deploying “response teams” all over the United States to help fight the “dangerous delta variant.”

Their message is clear. Be afraid. Stay afraid. And in your ignorant panic infested world, allow us to rule over you. They are continuing to keep the scam going by putting on whatever show they can. Now, it’s “response teams.”

According to a report by [state puppet propaganda outlet CNBC](#), the teams are comprised of officials from the Centers for Disease Control and Prevention and other federal agencies. They will “work with communities” at higher risk of experiencing outbreaks, officials told reporters. And remember who is at “higher risk” according to the master: the un-“vaccinated.”

[COVID-19 mRNA Shots Are Legally Not Vaccines](#)

Most of us have already figured out that this COVID scam was never a “war on a virus” but a war on humanity. White House Covid czar Jeff Zients said during a White House news briefing on the pandemic: “To be clear, the federal government stands ready to meet the moment and work with our state partners to respond to the delta variant.”

The teams will also increase testing ([which is inaccurate 100% of the time](#)) to expand detection of the virus ([which hasn’t been isolated](#)), facilitate contact tracing ([mass surveillance and spying](#)), and provide therapeutics ([experimental gene therapy](#)) to help treat those who become infected, he said, adding the government is ready to provide additional personnel.

There are 1,000 counties in the U.S. that have vaccination coverage of less than 30%, CDC Director Dr. Rochelle Walensky said at the briefing. These counties, primarily in the South and Midwest, are the most vulnerable to the variant, she said. They are determined to stoke the fear. The best defense, is to be unafraid and continue to ask questions and speak truth to power.

“As we continue to work with communities across the country **to get more shots in arms**, we will also

be working with governors and state and local health authorities to identify and address the needs on the ground in places with emergency outbreaks,” Zients said. Their goal is not to help anyone, it is to get as many humans possible shot up with whatever is in those COVID-19 “vaccines.” That has become all too clear for those really paying attention.

“We need to vaccinate now. I mean get everyone vaccinated now because these mutations are going to continue to occur,” said Dr. Paul Offit, a pediatrician and vaccine advocate who has served on advisory panels for both the [CDC and the Food and Drug Administration](#). It’s only July but **“as we head into the fall and early winter you’re going to see a surge and there are too many people in this country who are still unvaccinated.”**

And that’s probably going all be made up and blasted all over the TV to try to convince those who are still “hesitant” to get the “vaccine.”

This “delta variant” rhetoric is getting intense and they are continuing to lie and scare the public. Stay prepared. We should all be ready for anything at this point. There is no telling what the rulers will do as the slaves begin to put two and two together. If there’s any chance that they cannot pull off this “delta variant” scam, they will try something else, and we should be watching because it may actually be real and sinister this time.

Keep honing those critical thinking skills.
