

## The William Bisset Report: HORRIFIC Pfizer Data Unlocked by 80 Year Old Academic (VIDEO, 27 min )

### Description

NEW ZELAND: A Timaru, New Zealand, based 80 year old mathematician tells of his findings into Pfizer data that was legally forced to be released which included 600 deaths within 24 hours along with a host of other inconsistencies.

In his working life, Philip has moved in close to a dozen different academic directions. His journey has embraced successful lawcourt work in as an expert in mathematics and computer technology. In this video his past work lecturing in data organisation and control opens up what we could call Pfizer's previously tightly drawn dark curtains.
