

Thousands of Physicians and Medical Scientists Sign “Rome Declaration” in Protest, Launch New Information Platform

Description

Over 7,200 physicians and medical scientists worldwide have signed the “Rome Declaration” to alert citizens about the deadly consequences of Covid-19 policy makers’ and medical authorities’ unprecedented behavior; behavior such as denying patient access to lifesaving early treatments, disrupting the sacred, physician-patient relationship and suppressing open scientific discussion for profits and power.

The Declaration was created by physicians and scientists during the Rome Covid Summit, and immediately catalyzed support from doctors around the world. These professionals, many of whom are on the front lines of pandemic treatment, have experienced career threats, character assassination, censorship of scientific papers and research, social media accounts blocked, online search results manipulated, clinical trials and patient observations banned, and their professional history and accomplishments minimized in both academic and mainstream media.

Though the declaration’s signatories are diverse in their specialties, treatment philosophies and medical opinions, they have risen up to take a collective stand against authoritarian measures by corporations, medical associations, and governments and their respective agencies. The objective of the declaration is to reclaim their leadership role in conquering this pandemic.

In concert with the declaration, the signatories have created a “Doctors – and Scientists-only” COVID information platform so that citizens can make informed decisions for their families without interruption, manipulation, politicization, or profiteering from external forces outside of the doctor-patient relationship.

Dr. Robert Malone, architect of the mRNA vaccine platform, reads the Rome Declaration:

Read the Rome Declaration below.

We the physicians of the world, united and loyal to the Hippocratic Oath, recognizing the profession of medicine as we know it is at a crossroad, are compelled to declare the following;

WHEREAS, it is our utmost responsibility and duty to uphold and restore the dignity, integrity, art and

science of medicine;

WHEREAS, there is an unprecedented assault on our ability to care for our patients;

WHEREAS, public policy makers have chosen to force a “one size fits all” treatment strategy, resulting in needless illness and death, rather than upholding fundamental concepts of the individualized, personalized approach to patient care which is proven to be safe and more effective;

WHEREAS, physicians and other health care providers working on the front lines, utilizing their knowledge of epidemiology, pathophysiology and pharmacology, are often first to identify new, potentially life saving treatments;

WHEREAS, physicians are increasingly being discouraged from engaging in open professional discourse and the exchange of ideas about new and emerging diseases, not only endangering the essence of the medical profession, but more importantly, more tragically, the lives of our patients;

WHEREAS, thousands of physicians are being prevented from providing treatment to their patients, as a result of barriers put up by pharmacies, hospitals, and public health agencies, rendering the vast majority of healthcare providers helpless to protect their patients in the face of disease. Physicians are now advising their patients to simply go home (allowing the virus to replicate) and return when their disease worsens, resulting in hundreds of thousands of unnecessary patient deaths, due to failure-to-treat;

WHEREAS, this is not medicine. This is not care. These policies may actually constitute crimes against humanity.

NOW THEREFORE, IT IS:

RESOLVED, that the physician-patient relationship must be restored. The very heart of medicine is this relationship, which allows physicians to best understand their patients and their illnesses, to formulate treatments that give the best chance for success, while the patient is an active participant in their care.

RESOLVED, that the political intrusion into the practice of medicine and the physician/patient relationship must end. Physicians, and all health care providers, must be free to practice the art and science of medicine without fear of retribution, censorship, slander, or disciplinary action, including possible loss of licensure and hospital privileges, loss of insurance contracts and interference from government entities and organizations – which further prevent us from caring for patients in need. More than ever, the right and ability to exchange objective scientific findings, which further our understanding of disease, must be protected.

RESOLVED, that physicians must defend their right to prescribe treatment, observing the tenet FIRST, DO NO HARM. Physicians shall not be restricted from prescribing safe and effective treatments. These restrictions continue to cause unnecessary sickness and death. The rights of patients, after being fully informed about the risks and benefits of each option, must be restored to receive those treatments.

RESOLVED, that we invite physicians of the world and all health care providers to join us in this noble cause as we endeavor to restore trust, integrity and professionalism to the practice of medicine.

RESOLVED, that we invite the scientists of the world, who are skilled in biomedical research and

uphold the highest ethical and moral standards, to insist on their ability to conduct and publish objective, empirical research without fear of reprisal upon their careers, reputations and livelihoods.

RESOLVED, that we invite patients, who believe in the importance of the physician-patient relationship and the ability to be active participants in their care, to demand access to science-based medical care.

IN WITNESS WHEREOF, the undersigned has signed this Declaration as of the date first written.
