

Top Secret Pfizer Documents Leaked: Pfizer Knew That Vaxx Would Kill Thousands (VIDEO 23 min)

Description

The house of lies built around Covid-19 is collapsing everywhere. Mask mandates are ending everywhere. Even California and Oregon have stopped mandating masks in school.

But the biggest house of lies that is falling apart is the one around these vaccines they've spent more than a year trying to force us all to take.

Thanks to some unknown hero, we now have internal documents prepared by Pfizer, exposing the whole truth about all the adverse health events suffered by the people who participated in their vaccine trial.

This information was supposed to stay top secret. It says so right on the document. Every single page has "CONFIDENTIAL" in big capital letters at the bottom. But it's not confidential now. We have the information. And here's what it tells us. It tells us about more than twelve hundred fatal adverse events from people who received the Pfizer shot, out of 42,000 reported adverse events.

This document has a nine-page list of "adverse events of special interest." Just to pick out a few at random: Acoustic neuritis, aortic embolus, Cerebellar embolism, Crohn's disease, epileptic psychosis, infantile spasms, meningitis, swollen tongue. Honestly, it wouldn't be a bad segment if I just read off all of these. There must be a thousand or more, and I'd be reading them for half the show. But we have guests to get to as well.

Dr. Robert Malone is still fighting the battle for truth after getting banned from Twitter and sparking the campaign to annihilate Joe Rogan. Hopefully he can help us understand this Pfizer document better.
