

TRUCKERS VICTORY: Ontario Premier Forced to End Vaccine Passports

Description

CANADA: On Thursday, Ford telephoned supporters letting them know that he is about to scrap the province's vaccine passport scheme.

One supporter secretly recorded the call (*posted below*).

[Rebelnews.com](https://rebelnews.com) reports: Ford starts his call by saying he had received "about 250 [messages] as of lunch today" asking him to scrap the passport.

"We're pulling these passports. We're going to get back to normal. I can't get you the exact date, but it's going to be very soon. I'll be speaking over the next few days. Friday I'm going to put out a statement. Monday I'll be giving some dates. And we're going to move forward."

The dramatic about-face from Ford comes as thousands of truckers across Canada have engaged in peaceful protests, including blocking the Ambassador Bridge between Detroit and Windsor.

Removing vaccine mandates and passports is a key demand of truckers. Public opinion has shifted dramatically during the past two weeks, with most Canadians now saying it's time to end the lockdowns.
