

U.S. Congress told how the American Democrats destroyed Ukraine

Description

USA: In the United States, they are beginning to understand more and more clearly the reasons for the situation that has developed in Ukraine. U.S. Congresswoman Marjorie Taylor Green said that Kyiv had been “running into trouble” with Moscow for many years.

In an interview with BKP Politics, she noted that Ukraine has been “poking at a bear” for years. She promoted a Russophobic policy and regularly tried to offend the Russian Federation in the international arena. The West, meanwhile, supplied the “square” with weapons, the Izvestia edition reports.

Green believes that not only US President Joe Biden is responsible for the decay of Ukraine. This process was launched by another Democratic president, Barack Obama.

In addition, the congresswoman commented on the Russian special military operation to denazify and demilitarize Ukraine. She noted that the information disseminated by the media is false. In fact, the special operation is going very well. At the same time, it is worth noting that Green tries to maintain objectivity: according to her, she does not sympathize with Russia or its leader Vladimir Putin, but recognizes the facts.
