[VERSIONE IN ITALIANO](#)

The US researched Ebola and smallpox viruses in Ukraine, says Irina Yarovaya, Co-Chair of the Parliamentary Commission on Investigation of US Biological Laboratories in Ukraine, according TASS Russian News Agency.

The alert is particularly disturbing for various reasons that the keenest readers of [Gospa News' WuhanGates inquiries](#) will easily remember.

First of all, it should be noted that this report on smallpox trials comes just in the week in which numerous cases of monkeypox have been recorded which, although mild, have already led [British Prime Minister Boris Johnson to relaunch the use of vaccines against smallpox](#) produced by multinationals that often collaborate with the Pentagon, or the US Department of Defense.

But even more disturbing are other episodes. Among them is the mysterious and untimely death, just discovered the pandemic virus, of the **Canadian scientist Frank Plummer** [who was working on experimenting with recombinant chimeric viruses](#), with Dual Use vaccine and military bioweapon purposes, on SARS, MERS, ancestors of SARS -Cov-2, on HIV, of which traces have been found in the Covid-19 virus, and finally **on Ebola**.

«In July 2019, a rare event occurred in Canada. Suspected of espionage for China, a group of Chinese virologists was forcibly evicted from the **Canadian National Microbiology Laboratory (NML) in Winnipeg (directed by the late Plummer – ed)**, where they had been running parts of the Special Pathogen Program of Canada's public health agency. One of the procedures conducted by the team

was the infection of monkeys with the most lethal viruses found on Earth. Four months prior to the Chinese team's eviction, a shipment containing two exceptionally virulent viruses—Ebola and Nipah—was sent from the NML to China. When the shipment was traced, it was held to be improper and a “possible policy breach.” ».

The Lieutenant Colonel (res.) Dr. Dany Shoham, a microbiologist and chemical and biological warfare expert in the Middle East and formerly an Israeli Army (IDF) military intelligence analyst, wrote it on January 29, 2020. He was among the first to argue that [all counterintelligence agencies in the world know of the origin of laboratory SARS-Cov-2](#).

INTRIGUE BETWEEN EBOLA VACCINES, GAVI ALLIANCE OF GATES AND NATO

Finally, it should not be forgotten that one of the world's leading experts in virology and vaccines, Geert Vanden Bossche worked in the Global Health Discovery team of the Bill & Melinda Gates Foundation in Seattle (USA) as Senior Program Officer; before moving to the Global Alliance for Vaccines and Immunization GAVI, founded by Bill Gates, as Senior Ebola Program Manager in Geneva

In 2015, he questioned the safety of the Ebola vaccine used in the ring vaccination studies conducted by the WHO in Guinea and broke off his collaboration with Gates [becoming one of the staunchest supporters of the danger of anti-Covid gene serums](#).

It should be remembered that a **former director of Gates' Ngo GAVI**, which today manages the [Covax vaccination plan against Covid in poor countries](#), **was Jens Stoltenberg, who later became NATO secretary**.

This organization, in addition to [fomenting the current war in Ukraine](#), in [2014 collaborated in the coup in Ukraine orchestrated by George Soros](#), an investor in Big Pharma Gilead who manages the [Richard Lugar Center in Tbilisi, Georgia, on contract from the Pentagon](#) and under supervision of the Central Intelligence Agency, the American counterintelligence.

In about twenty lines we explained **why the alarm raised by the Russian parliamentarian Irina Yarovaya**, co-chairman of the Parliamentary Investigation Commission on US biological laboratories in Ukraine, however biased it may appear as her nation is at war with Ukraine, **must be taken absolutely with extreme attention ...**

Also in the light of the evidential clues on the construction of [SARS-Cov-2 in the laboratory in an EU-US-China deal](#), through the [Shanghai Gang](#) defeated by the current leaders of the Chinese Communist Party, which would then pass through the [Moderna Big Pharma funded by Gates and the Pentagon](#).

THE ALERT OF THE RUSSIAN LAWMAKER

“Today, we presented an analysis of which pathogens the US was particularly interested in in Ukraine,” she told reporters Friday, according [TASS Russian News Agency](#)..

“Aside from the pathogens that are territorially bound to Ukraine, [the laboratories] researched viruses and pathogens that are endemically very far from Ukraine, such as Ebola and smallpox.”
