On March 9 and in the night from 9 to 10, the howitzer was firing at Solnechny microdistrict (right on the Kharkiv circle road). It is not clear why this was done, there are no RF Armed Forces in the area.

13:00 Russian soldiers continue to identify representatives of territorial defence (https://t.me/journalist_lnr/1029) in Ivankiv. In most cases, they are drug addicts and former prisoners. One of the detained nationalists, says that the Ukrainian military forbids residents to leave their settlements, even for the purpose of evacuation. Civilians are real hostages in the hands of nationalist groups, which directly threatens their security.

Real Gestapo agents.
