

Video: Rogan Exposes How West Has Done A Complete 180 On 'Corrupt' Ukraine

Description

UKRAINE: "They were talking about the massive corruption of Ukraine, and how horrible it was over there. And now, all of a sudden, they're looking at it like they're heroes."

Joe Rogan noted on his podcast that the Western narrative on Ukraine has flipped 180 degrees in a few weeks from the country having a [horrible corrupt government](#) to being heroic allies against the Russian scourge.

"I have this screenshot that someone sent me," Rogan stated, "about the way the people on the left were talking about the Ukraine situation before the war."

He continued, "This is one of the things that's so weird is that they were very disparaging of Ukraine, and they were talking about the [massive corruption](#) of Ukraine, and how horrible it was over there."

"And now, all of a sudden, they're looking at it like they're heroes. The same exact people. This is what's confusing," the host added.

Rogan then read out points from the screenshot he referenced wherein Ukraine was labeled "[the most corrupt nation in Europe](#)" with an "[increasingly corrupt and authoritarian](#)" [leader](#) who is seeking to [deepen an "alliance with the far right"](#).

"We're supposed to just veer away from the narrative that was being pushed just a couple years ago," Rogan asserted.

Rogan also went on to point out how insane it is that Facebook and other social media platforms are [officially sanctioning violent rhetoric](#) against Russians, exclaiming "What the f*ck is that? What is that?"
