

WARNING: Covid Vaccine Recipients Will Drop Dead Over The Next Several Years

Description

“A lot of the integral organs just basically liquify ... from all the inflammation, from the cytokine storm; so you would look at not just the lungs, but the liver, the kidneys, the spleen, and the pancreas, they’re all going to under go this damage because it’s a body-wide cytokine storm.” -Dr. Jeff Sullender.

In a string of radio interviews, one doctor explains how all the Covid vaccines in current use are going to have the very strong potential of murdering its own host.

Dr. Jeffrey Scott Sullender was a guest on Eric John Phelps’ 24/7 World Radio broadcast discussing some of the different things surrounding some of the various areas of Covid-19, such as the testing done for the virus, the isolation of it, the rewriting of definitions, doctors being threatened for voicing some different opinions, and the purpose of the vaccines and what the vaccines will do.

Dr. Sullender is a Ph.D. and a Certified Clinical Nutritionist (CCN) by the Clinical Nutrition Certification Board. He has been in full-time practice since 1982 and pioneered many of the natural therapy approaches now commonly available.

In the audio clips compiled by King James Video Ministries, Sullender explains the misdiagnosis for Covid per the PCR tests.

He explains that the PCR (Polymerase Chain Reaction) was designed specifically to test for a chronic disease, not an acute disease, which is what Covid-19 is classified as. He additionally noted, the creator of the PCR test, Dr. Kary Mullis, a Nobel Prize winner in Chemistry for his invention – has been on the record explaining that his test is not designed for a disease such as Covid-19. Not only that, he also infers to Dr. Anthony Fauci admitting that the PCR test is practically useless in this context of Covid, noting that the threshold cycles used to test for Covid are purposefully being altered to result in more false-positives, and for the vaccinated to more readily test negative by readjusting that threshold.

*AUTHOR’S NOTE: This information and the following that is discussed in this radio broadcast, and more, can be found in our document “**Facts Are Facts: Learn The Data Surrounding Covid-19**” – containing direct quotes*

and citations for this evidence.

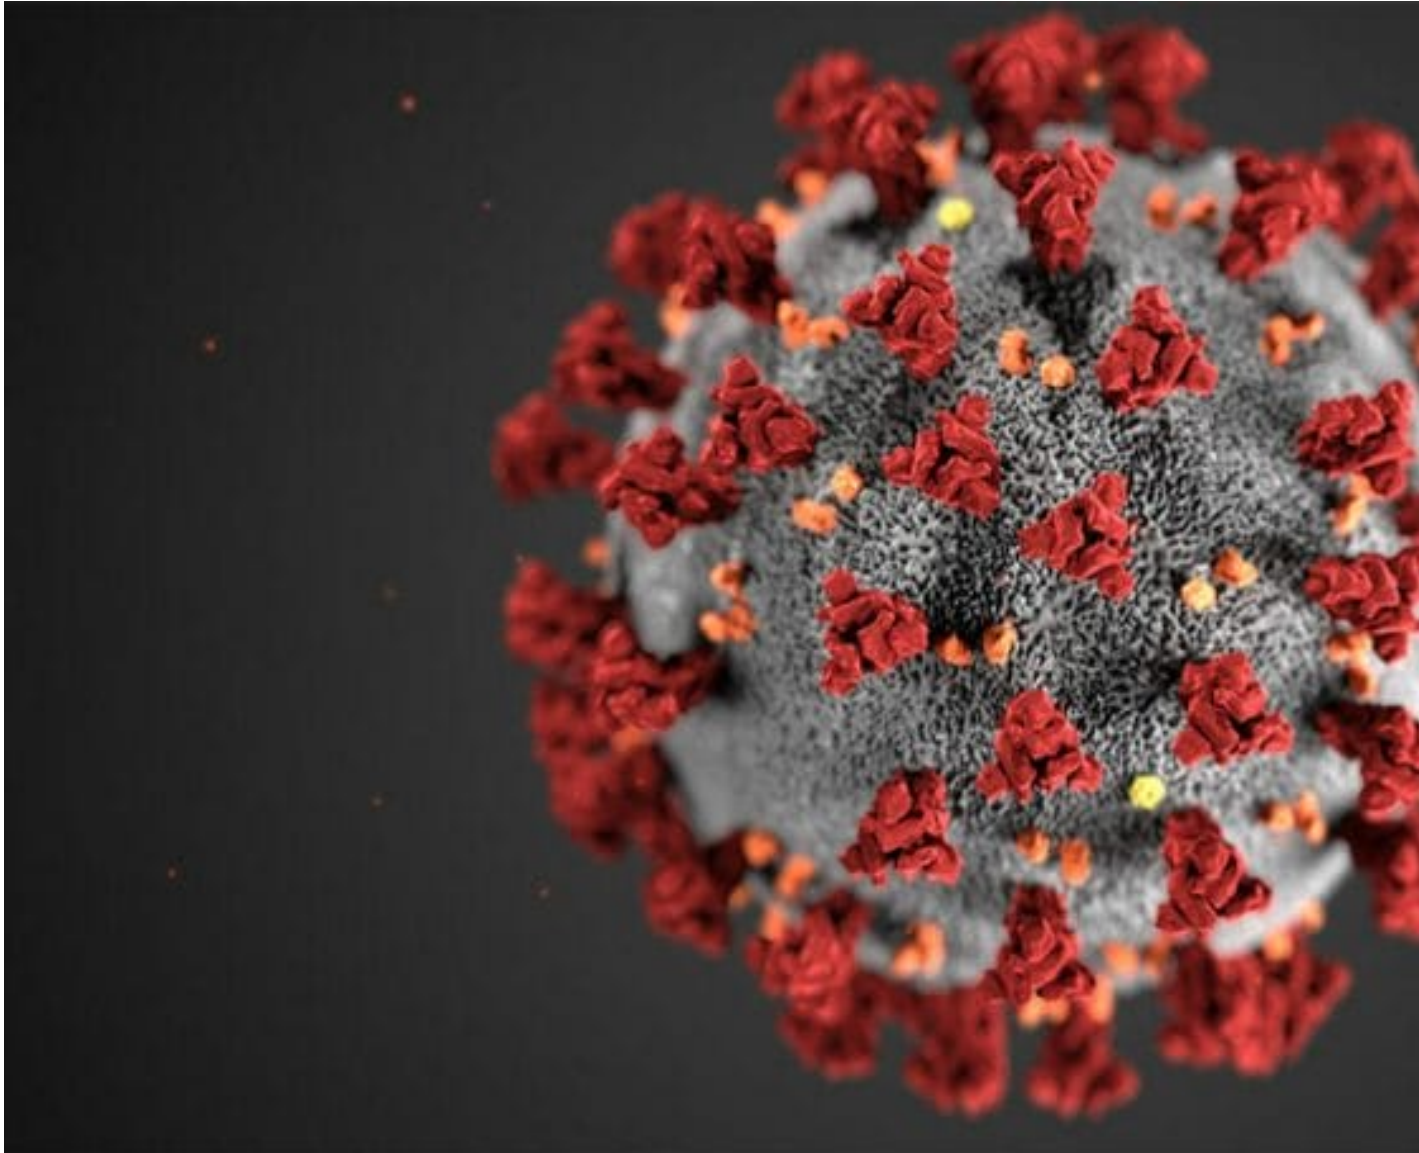

Sullender goes onto explain that the virus itself has never actually been isolated. He says many other doctors have approached the CDC for the isolated material and they can never get a sufficient answer.

He also notes that some of the definitions of words have been redefined without anyone really noticing. He uses the example of the term 'case.' In the medical field, cases used to be referred to the actual sickness itself. For example, "someone has a case of the sniffles." But now, 'case' is being defined as someone who tests positive for Covid-19.

Dr. Sullender also notes that many dissenting voices in the medical and science fields have been severely threatened, blackballed, and blacklisted: such is the case with individuals such as **Dr. Joseph Mercola**.

Then in the third radio interview, Dr. Sullender specifically breakdowns the Covid vaccines. As explained in other reports by The WinePress as well, Sullender says the goal of the vaccines is to force the body to create more spike proteins.

To remind listeners, Sullender says that on the CGI depictions we have seen of Covid-19, the red "fuzzies" are the supposed spike proteins.

Courtesy: Arlington Public Library

[The spike proteins] induces your cells to produce through its normal machinery, then tells the Ribosomes to make spike proteins. In fact they would be somewhat artificial because this is again a synthetic gene therapy to make your cells make spike proteins.

Your cells, (once you are injected), your cells in your body start producing spike proteins into your tissues, to your blood, lymphatic [system]; and spike proteins, which being foreign to your body (not being you and being native to the surface of the coronavirus), your body will see the spike proteins your body is making, and make antibodies to the spike proteins.

Dr. Sullender

Referencing previous studies and sources, Sullender explains why there has never been a successful vaccine for the previous coronaviruses. In the previous trials when those vaccines were being tested on animals, all the animals in the test eventually died. The studies revealed that the animals did not die

initially from the vaccine, but only after the animals were faced with a wild, naturally occurring disease. This was due to a weakening immune system. Essentially, when a flu season of sorts came around the animals died.

So as with the vaccines, when the body sees the spike proteins and it creates the antibodies to stop it. In the animal studies, the animals, by and large, were fine until they were faced with a provocative virus later on. When this happened their immune response was catastrophically out of proportion of what was needed.

Phelps then said this sounds like an auto-immune disease, to which Sullender responded with an emphatic “Exactly.”

According to **Healthline**, an autoimmune disease is,

A condition in which your immune system mistakenly attacks your body.

The immune system normally guards against germs like bacteria and viruses. When it senses these foreign invaders, it sends out an army of fighter cells to attack them.

Normally, the immune system can tell the difference between foreign cells and your own cells.

In an autoimmune disease, the immune system mistakes part of your body, like your joints or skin, as foreign. It releases proteins called autoantibodies that attack healthy cells.

Some autoimmune diseases target only one organ. Type 1 diabetes damages the pancreas. Other diseases, like systemic lupus erythematosus (SLE), affect the whole body.

Sullender refers to some of the diagnosis’ of this condition in the context of Covid being labeled as “antibody dependent enhancement,” or “cytokine storm:” when the body is faced with a natural disease, the body acts 100 times more than it needs to resulting in the host dying.

Essentially, as he explains, the antibodies will cross-react in the host body attacking the cells that are laced with spike proteins, which can be various organs, tissues, and other important bodily functions.

Phelps asks if the body will be able to produce enough white blood cells to prevent this reaction. Sullender says to a point but will not be enough to stop the problem, as the cells have been ‘rewired’ to habitually create spike proteins. Additionally, Sullender, referring to many other doctors, have serious questions as to when the body will stop producing these spike proteins. No one can get a clear answer.

The WinePress has explained in other reports, and in our booklet detailing all the necessary data surrounding this, Moderna and Pfizer’s vaccines utilize mRNA, which has never been used before, to alter an individual’s DNA. It then tells the DNA to continually make new spike proteins, which is then transferred via nanoparticles, as shown in the list of ingredients for the vaccines. As in the case for the J&J and AstraZeneca vaccines, the spike proteins are being directly injected into the body to then replicate.

When somebody dies, and they have to determine – should determine whether it was from something separate or from the injection; apparently, and I am not a pathologist, but they can tell by looking at the different organs if it's a cytokine storm, a lot of the integral organs just basically liquify ... from all the inflammation, from the cytokine storm; so you would look at not just the lungs, but the liver, the kidneys, the spleen, and the pancreas, they're all going to undergo this damage because it's a body-wide cytokine storm.

Dr. Sullender

He also references long-time former official from Pfizer, Dr. Mike Yeadon, explained that the proteins put in use are very similar to that of the female placenta, explaining why so many women are having miscarriages and premature abortions. Yeadon came to the conclusion that the only real benefit to these vaccines are for depopulation.

Snopes, the fact-checking website, gave this statement by Yeadon a [“Correct Attribution”](#) rating. Though Snopes goes onto to say that Yeadon's claims are based on lack of evidence, they do affirm this statement to be true.

Near the end of the radio interview, Phelps and Sullender discuss the large number of cases of the vaccinated sticking magnets to the injection site and the magnet sticks. We noted this and provided plenty of clips of that in a [separate report](#).

Sullender recalls one video where he saw a man hold an EMF meter to the injection site, and it transmitted a frequency identical to a computer. Sullender presents a theory that the cell towers are feeding into the nanotech in the body or the nanotech is stealing your cellular energy and rebroadcasting it – acting as a continual drain on the person's energy, which could confirm the number one complaint of the vaccines: fatigue.

To hear the audio for yourself, watch the video below with Bryan Denlinger of King James Video Ministries giving some brief commentary. To view this video and many more like it, visit his [website](#) to see more.
