

WEF promises to ban “dangerous” eggs following scientific discovery that eating them cures covid naturally

## Description

The global “elite” are attacking eggs by calling them dangerous and deadly after it was revealed that the high-protein superfood is a natural cure for covid.

The World Economic Forum (WEF) tweeted a lie stating that eating eggs “increases the risk of heart attacks and strokes,” the suggestion being that people should stop eating them for their own safety.

We know the truth that covid “vaccines” are responsible for the sudden uptick in heart attacks and strokes being observed all around the world, but the WEF is trying to convince everyone that eggs, which are currently in short supply, are worse than crack cocaine or heroin.

Globalist-aligned “scientists” claim that eating eggs could cause blood clots leading to death – a convenient cover story for the hordes of “fully vaccinated” people who are dying every single day from the injections.

The claim is that choline, a nutrient found in eggs, somehow contributes to the alleged blood-clotting activity of this superfood. Choline consumption, we are told, is why people everywhere are *dying suddenly*, seemingly without cause.

## They want you eating bugs and “plant-based” poisons, not healing eggs and meat

It was none other than the Cleveland Clinic, a conventional medicine hotbed of deception, that put out this new misleading research. (Related: In 2014, the Cleveland Clinic did embrace traditional Chinese medicine [TCM] as a viable medicinal protocol.)

According to the Cleveland Clinic, choline, a dietary supplement that is also deemed to be an essential nutrient, is suddenly dangerous now that covid “vaccines” have been introduced. Coincidence?

Joe Rogan spoke about this lunatic new “study” from the Cleveland Clinic on his podcast show, revealing to his millions of followers on Instagram that choline and eggs are healthy, not harmful.

It would seem as though the WEF is attempting to kill two birds with one stone by deflecting from covid injections and placing blame for their adverse effects on eggs, which just so happen to be seeing a nationwide shortage due to “avian flu” and supply chain problems.

It only makes sense that the WEF would embrace such tactics, seeing as how its current leader, Klaus Schwab, was mentored by globalist Henry Kissinger who infamous stated that:

“Who controls the food supply controls the people; who controls the energy can control whole continents; who controls the money can control the world.”

Interestingly, the WEF tweet about the “dangers” of eating eggs came just as billionaire eugenicist Bill Gates introduced a new artificial egg concept from which he hopes to profit in the future.

“Bill Gates has a history of investing in everything that is artificial, including insect protein, Beyond Meat, and a cornucopia of vaccines,” reports *Newspunch*. “So it should come as no surprise that he invested in Hampton Creek, the company that is bringing artificial eggs to the mainstream.”

Hampton Creek was recently renamed Eat Just, and real eggs just so happen to have spiked in price by 66 percent this year compared to last. As a result, some consumers have already made the switch to fake eggs, which is great for Gates’ profit streams.

A number of egg farms have also exploded or caught fire in recent months – also a “coincidence,” surely.

“The elites’ carefully laid plan is playing out in front of our eyes, and it all leads towards a decreased supply of eggs and meat and an increased supply of insects and synthetic foods,” one report explains about what is currently going on in America.

“Considering the fact that humans have a natural inclination to eat nutrient-dense, natural foods, why are they insisting on forcing us to eat insects and artificial slop? Because, to the elite, bad is good.”
