

WEF Says US Must Implement 'One Child Policy' For White Families

Description

The World Economic Forum has announced a controversial new policy that should have everybody who opposes eugenics up in arms.

Klaus Schwab's WEF is now calling for the US to impose a strict 'one child policy' on all white families in an effort to promote diversity, reduce inequality, and usher in a new era of "post-politics" in which nobody in society disagrees on major policy issues.

We are going to come back to the WEF's latest talking point of "post politics" in a future video, because it is possibly the most disturbing element of this whole disturbing policy. B

Schwab's new policy for America is clearly influenced by Chinese social policy which should come as no surprise. The WEF leader appeared on Chinese TV recently praising the Chinese Communist Party's social policies while arguing that white people in America are no longer "relevant" to the WEF's plans for global progressive change.

China's 'one child policy' is thought to have prevented over 400 million births. And this is to the detriment of the Chinese society. Due to China's one-child policy, it now has a declining workforce to serve its largely greying population. But according to Schwab, America must follow China's reforms and implement the barbaric one-child policy on white families.

Klaus Schwab wants you to shape the future of America by imposing a eugenics policy on the nation to decrease the number of white people.

He wants you to own nothing and be happy. Here at the People's Voice, we know that this is a recipe for enslavement, not happiness. We want you to own everything and be happy.

The WEF, which has ordered mainstream media outlets to begin seeding the one-child narrative in the minds of Americans, wants to introduce the policy in the US as a matter of urgency.

Quartz interviewed Bowdoin Philosophy professor Sarah Conly who argued the US and all Western countries should adopt a one-child policy because human beings pose a grave threat to the planet.

Conly's argument fits like a glove with the WEF's barbaric depopulation agenda.

What is scary about this piece is the growing number of voices within the academic elite that feel the same way as Dr. Conly. A similar piece written by Thomas Bartlett appeared in The Chronicle of Higher Education. While these are just two voices, they are beating the drum of many that believe that American society needs to reduce our carbon footprint by reducing the number of feet in American homes.

However, if you have been paying attention to the WEF's policies in recent times you will realize that this is not really about saving the world. WEF policies all have one thing in common: they dehumanize, degrade and mock us. They are designed to eliminate the sovereignty of nations and maximize the power of the global elite.

Without the force of government, the WEFs "One America, One Child" campaign can never rival the effectiveness of China's policy. A rallying cry to "save the planet" and "embrace diversity" lacks the power growing out of the barrel of a gun. But with globalists pushing for more stringent environmental regulations and federal funding of Planned Parenthood, how long before the WEF-penetrated Democrat government jumps on board with Klaus Schwab's barbaric policy?

Don't forget, Joe Biden is a fully paid up member of the club.

This is called eugenics and was a central goal of the Nazis under the Third Reich.

Tucker is right. Radical Democrats and the WEF are pursuing eugenics goals and attempting to re-create America so they can better control it.

A glance at history shows that humanity has routinely rejected depopulation programs like the Third Reich's Nazi eugenics campaign. We understand on a basic human level that no government or globalist organization should have the god-like power of creation and destruction over the human race.

But what if I told you the eugenics movement did not actually die, but simply went underground, where it has remained hugely influential in elite circles, including Klaus Schwab's World Economic Forum?

As the co-founder of the American Eugenics Society Frederick Osborn put it in 1968, *"Eugenic goals are most likely to be attained under a name other than eugenics."*

More than 60 years after Osborn uttered this statement, the eugenicists have finally achieved their goals. The Covid vaccine is simply eugenics under another name. The WEF's one child policy for American white families, introduced under the guise of saving the planet, is really social eugenics on steroids.

This power-hungry cabal of billionaires and politicians has long plotted to enslave the masses, and now they are making their move.

If we do not comply with their demands, the WEF warns, we will face certain doom. They claim that only by handing over our freedom and autonomy to the elite can we hope to avoid the disasters that are looming on the horizon.

But more and more people are refusing to submit to the WEF's tyrannical demands. Brave activists and rebels are rising up to fight back against the global elite, determined to defend their sovereignty at

any cost, determined to protect their families and those they love.

Will you join them in the fight for freedom, or will you cower in fear and submit to the demands of the global elite? The choice is yours. But whatever you do, do not underestimate the consequences of your choices.
