

WEF Will Starve A Billion Human Beings To Death

Description

In their discussion, Jordan Peterson
and Michael Yon blame
“Neo-Liberal” fantasies about climate,
carbon dioxide and nitrogen
for the coming mass starvation
and mass migration and discuss Mark Rutte’s
war against Dutch farmers. They can’t say
“Neo Liberal” means Cabalist Jewish (i.e. Communism.)
The WEF is Organized Jewry and Freemasonry (Satanism.)
They plan to exterminate useless eaters.

I don’t see how we could possibly be stupider here in the West unless we took courses in stupidity.
Jordan Peterson

The following are some quotes from a recent Jordan Peterson video:

The World Economic Forum at Davos says 1.2 billion people will be forced to migrate. Lara Logan

The WEF (World Economic Forum) wants to build a tri-state “Smart City” out of farm land taken from the Netherlands, Belgium and Germany to be populated by tens of millions of immigrants from around the world. Michael Yon

One billion people will starve to death by 2025. Michael Yon

Kill a billion people and force another billion to migrate from their homes in the Third World knowing that the lack of food combined with massive migration will lead to a pandemic. Perhaps, even the one that Bill Gates predicted.

In their discussion Peterson and Yon lay much of the blame for the coming mass starvation and mass migration to Neo-Liberal fantasies about climate, carbon dioxide and nitrogen. They did heatedly discuss Mark Rutte and his war against Dutch farmers.

Wageningen University in the Netherlands is probably the best agricultural school in the world. In 2019 the Dutch were the second largest exporters of food worldwide. They did tell their academics that their research would be restricted to improving Dutch farming productivity, not allowed would be studies on the history of Alpacas prior to the Spanish era in South America. The Dutch grew 890,000 pounds of tomatoes per acre in greenhouses. In the past they sent lots of food to Britain, the EU and elsewhere.

That was until NATO (or really the US) tried to implement their pipe dream of establishing a first strike nuclear capability by moving their missile launching pads ever closer to the Russian border, maybe even near those 26 biolabs.

The latest step on the path to mass starvation was taken by Dutch Prime Minister Mark Rutte when he announced his new goal – reducing nitrogen emissions 50% by 2030.

PM Rutte, who is also a member of the Bilderberg Society, said that Holland would be coordinating their farm policies with the World Economic Forum. WEF believes that our present system of growing food is fragmented which means that there are too many farmers making too many decisions and that all decision making should reside in Davos and maybe the UN.

It should be pointed out that the Bilderberg Society was founded by the Rothschilds and the Rockefellers. David Rothkopf, the former CEO of Kissinger Associates, wrote *Superclass* in 2006 in which he said the West was ruled by 30 Families and their 6,000 Minions. Our climate policies which designates carbon dioxide and now nitrogen to be pollutants would not stand serious debate if those 6,000 Minions allowed us to have free and open debate on climate change or anything else that mattered.

Tim Ball is a retired college professor from Winnipeg Canada. He pointed out that only 2% of all the gases in our atmosphere are called greenhouse gases. Supposedly these gases allow sunlight to strike the surface of the earth but do not allow the heat to escape. Of the greenhouse gases 95% are water vapor. Carbon dioxide is 4% of all greenhouse gases. But only 3.4% of all carbon dioxide is caused by human activity. So we are going to shut down farms and tax people trillions of dollars to regulate the 3.4% of the 4% of the carbon in the 2% of the atmosphere that are greenhouse gases.

The problem is that all actual scientific data tells us that the temperature increases before the carbon dioxide does.

I went to college for ten years but never studied agriculture until a few years ago when I became interested in gardening and climate battery greenhouses. Let me explain what is happening in the soil in our gardens and our forests. If a leaf on a tree wants calcium, it can send down a message to the roots demanding it. Mycorrhizal fungi can deliver any one of 41 elements to your tree, your corn crop or your rose bush in exchange for sugar produced in the leaves of your trees, bushes, flowers and plants. The soil biology below your feet includes, microbes, nematodes, arthropods and other creatures in addition to worms. The soil biology hibernates until the soil reaches 12 degrees Celsius (53.6 F) with worms waiting until 18 C (64.4 F). When it warms up, the soil biology in your garden breathes in oxygen and breathes out carbon dioxide.

Your plants thrive on that carbon dioxide rising out of your soil. American agricultural scientists who have studied at Wageningen University tell us that experiments with carbon dioxide have increased plant biomass by 30% which is a good thing as most people like to eat.

Hint: Worried about frosts killing crops? Increase the soil biology in your fields by feeding those little creatures compost and old leaves. The increase in soil biology will increase the temperature of the soil and save your crops from the same freeze that bankrupted your neighbor who spent his money on Big Ag inputs.

Previously, I have said the West will face total economic devastation and that we might not even have presidential elections in November of 2024. I also said that in America we have a federal form of

government so that when, not if, Washington DC collapses, we will still have state governors, state and local police, a state judiciary plus an army of sorts, the National Guard. Just don't depend on a Democrat governor to save you. And avoid all areas with a drought as you will be growing your food locally.

Below are two videos. One is of Dr Tim Ball explaining the lack of science behind carbon pollution. And the second is of Jordan Peterson discussing the vile creatures of the WEF and their plans to kill people by the billions.

The Ukrainians have taken 60,000 ethnic Russian children away from the Donbass back behind their frontlines. They might be being held as hostages. The local people in the Ukraine fear that the children might be trafficked to sexual predators, never to return. Please do what you can to save them:

David Rothkopf said the world is ruled by the 30 families and their 6,000 Minions. One group they use to control politics and the media is the Bilderberg Society. Jens Stoltenberg is a member of the
