

What Happens When 3 Billion Vaccinated People Have Undiagnosed Myocarditis?

Description

USA: I went to the nail salon this week, and there was a young women working there who started weeping inconsolably in a corner. I asked the manager what was wrong. “She just lost her mother” was the reply. She had died in her sleep suddenly though she was perfectly healthy.

This last weekend, I had attended the funeral of an old friend. He was perfectly healthy too, and then he got late-stage pancreatic cancer — and he was gone a few months later.

That was the exact same story for another friend. He was healthy as a horse, until he wasn't — because he too had suddenly developed late-stage pancreatic cancer.

Not to mention a young (and very fit) mother I know who just got a check-up, and was told that she too has suddenly developed aggressive cancer in her early 40s.

The perfectly healthy are getting bad cancers much too frequently now.

The perfectly healthy are dying suddenly.

What all of them shared was being vaccinated.

Steve Kirsch on Substack has conducted a survey (done by a third party) and the results are so disturbing that nobody in the corporate media will touch it.

Ten million Americans have heart injuries.

Ten million Americans had to be hospitalized after taking the vaccines.

Five million Americans can't work after being vaccinated.

At least 600,000 Americans died after getting vaccinated.

Executive summary

Our latest poll is devastating for the official narrative:

1. a 6.6% rate of heart injury (>10M Americans)
2. 2.7% are unable to work after being vaccinated (>5M Americans),
3. 6.3% had to be hospitalized (>10M Americans)
4. you were more likely to die from COVID if you've taken the vaccine.
5. Almost as many (77.4%) households lost someone from the vaccines as from COVID. If you believe that 1M people in the US have died from COVID, then **this survey indicates that ~750,000 people died from the vaccine** ($10.18/13.15 \times 1M$) with a 95% confidence of at least 600,000 deaths.

More than 5 billion people have been injected with at least one dose of a COVID vaccine — so if we extrapolate a 6% heart injury/hospitalization rate from the survey, that would mean 300 million people have been effected.

If Dr. Malone is correct and a majority of vaccinated people have undiagnosed myocarditis, that would mean 3 billion people are at serious risk of sudden cardiac death.

You can't imagine it (and I can't imagine it) but if that really happens to even a tenth of 3 billion people in the next few years, then we are talking about a world-altering event.

Wow, take a listen to this pilots story. More are coming out. These are the vaccine injuries cases. [#vaccineinjuries](#) [#pilot](#) [#Covid_19](#) pic.twitter.com/ves4F5Mpzn

If you've been paying attention on social media — or, most of all, on Substack — then you already know that this man-made disaster was happening on a vast scale because you've seen far too many posts of soccer players suddenly collapsing on the field, or young people hooked up to machines at the hospital after getting their first clot shot, just like me.

In fact, mortality rates for young people across Europe are rising dramatically — in yet another sign that the use of the experimental COVID vaccines should be halted immediately.

Healthy people are now dying so frequently and suddenly from heart failure that the totally corrupt corporate media has invented names like Sudden Adult Death Syndrome (“SADS”) to account for

these obviously vaccine-related deaths.

Suddenly, toddlers are now having seizures after getting vaccinated as well.

As for vaccinated women who are pregnant, they are experiencing miscarriages and still births at much higher rates than in the past.

What has the American medical community done about this catastrophe? They have aided and

abetted it the entire way.

They have taken the Big Pharma blood money and the Federal government's blood money — and they have stayed silent while they injected your friends and family with these deadly vaccines and watched them die.

You know it — and I know it.

When their patients asked for ivermectin to treat COVID, they denied them those prescriptions and treated them like deviants for asking — and they strongly recommended they get vaccinated instead.

When injured people had the audacity to complain about their vaccine injuries, our doctors and nurses gaslighted them, or told them to stay silent, or told them they had no clue why they were having problems.

It's the most shameful episode in the history of American medicine.

Sudden deaths. Infant seizures. Blood clots. Miscarriages. Heart attacks. Skyrocketing mortality rates. Declining birth rates.

You might think that the COVID virus has gone away, but the global vaccine nightmare has just begun.
