

While you were focused on Russia's invasion, the UK Government published a new report confirming the Fully Vaccinated now account for 92% of Covid-19 Deaths in England

Description

RUSSIA/UKRAINE: For three long weeks the mainstream media have chosen to broadcast nothing but unverified press releases from the Ukrainian Government, historic footage of conflict in Palestine and military parades; both passed off as the war in Ukraine, more Government press releases denying the Russian discovery of US funded Bioweapon labs in Ukraine, and ridiculous claims that Putin has gone mad because he is suffering from 'Long Covid'.

All this is being done to invoke fear among the public that World War III is just around the corner, and to make you wrongly blame Putin for the misery that has finally hit home in the form of inflation and tax rises. All thanks to over two years of the Government shaking the "magic money tree" to pay for things such as 'Test and Trace', a ridiculous quantity of experimental Covid-19 injections, and a Furlough scheme. A misery that has now been made ten times worse thanks to the sanctions placed on Russia by your Government.

But while the mainstream media has been hugely successful in making sure you focus on all of the above with their lies and propaganda, other terrible news is going unreported and slipping through the radar. Such as a new UK Government report which confirms the fully vaccinated population now account for 92% of Covid-19 Deaths in England, and shockingly, the vast majority of those deaths are among the triple vaccinated.
