

Worldwide Exclusive: Embalmers Find Veins & Arteries Filled with Never Before Seen Rubbery Clots

Description

USA: In this worldwide exclusive, Dr. Jane Ruby meets with board-certified Embalmer and Funeral Director, Richard Hirschman who reveals, for the first time ever, arteries and veins filled with unnatural blood clot combinations with strange fibrous materials that are completely filling the vascular system.

Many of the victims Hirschman embalmed reportedly died of heart attacks and strokes, which has been a highly reported side effect of the Covid 19 vaccine. According to the Government's Vaccine Adverse Reporting System (VAERS), the Covid 19 Vaccine has been responsible for over 20,000 deaths, with hundreds of thousands of injuries.

Mr. Hirschman reports that he found resistance when he tried to embalm these jabbed patients, and then found these strange materials and pulled them from the large vessels of the bodies. The images shown in this interview are terrifying. Hirschman also reported that he has gone from seeing 50% of his embalmed cases with these types of blockages rise to almost 80% in the last year and reveals these never before seen images and findings on the Dr. Jane Ruby Show.
